8x

Shelf Support Pins

2x

Shelves

STEP 1

Set the location of the new shelf position to suit your configuration. Count the same number of holes on each run and insert a shelf support pin.

4x

4x

TIP! – You can use a spirit level to quickly find the corresponding holes at the same height.

STEP 2

Insert the shelf at a raised angle, making sure to rest the self on the two back support pins.

Next, lower the front edge of the shelf onto the front two support pins.

Push the shelf inward until the shelf is flush with the back of the cabinet.

Repeat the same procedure for each additional shelf.

CABINET CARE INSTRUCTIONS

Everyday care for your cabinets:

Liquid spills should be cleaned up as they occur. Liquids and other damp objects, i.e. towels, will eventually cause permanent damage should they be left unattended.

Everyday clean-up of cabinets can be done with a damp cloth and a dry cloth. Ensure you use a clean cloth every time when wiping down your cabinets, as foreign dirt, grease, and oils may inadvertently be transferred to the surface.

Cleaning melamine products:

Oils, grease, and other soils that do not respond to water can be removed with a solution of mild soap and water. The surface should be rinsed immediately with a clean, damp cloth and dried thoroughly with a soft cloth to avoid streaking or moisture seeping into the seams around the edges.

PLEASE NOTE: Never use abrasive cleaners, ammonia, bleaching agents, scouring pads or powdered cleaners on any type of cabinetry.

Cleaning cabinet hardware:

Brass and Silver cleaners are not recommended for cleaning handles. Some of these cleaning solutions contain harsh chemicals that may damage the finish on your handles.

Wash your hardware with a solution of warm water and a small amount of mild dish detergent. Dry your hardware and areas around the cleaned area immediately.

Hinges can be cleaned with a dry cloth or cotton-tipped swab.
