

**RUST-OLEUM®  
TUB & TILE REFINISHING KIT**

**DESCRIPTION AND USES**

Rust-Oleum® Specialty Tub & Tile Refinishing kit is a 2-part epoxy acrylic designed to provide excellent adhesion, durability and colour retention in high moisture areas. It is ideal for use to renew ceramic tile and porcelain, fiberglass, acrylic, cast iron and steel tubs and sinks. It is not for use on galvanised steel or flexible plastic. Do not use on areas exposed to extreme heat such as stovetops, or constant high humidity environments. Do not use in continuous water immersion such as swimming pools, hot tubs, ponds, or saunas.

SKU	DESCRIPTION (946 mL)
385812	Gloss White

**PRODUCT APPLICATION**

**SURFACE PREPARATION**

Remove metal drains and hardware. Remove loose paint and rust with a wire brush or sandpaper. Repair chips and cracks with a patching compound. Remove any mildew with a solution of bleach and water and rinse thoroughly. Scrub dirty or stained surfaces with an abrasive cleaner. Rinse with fresh water and allow to thoroughly dry. Remove all caulk. Wipe area clean. Prepare surface with an abrasive pad and a hard water cleaner. Rinse and repeat if necessary. Sand entire surface with #400/#600 grit wet/dry sandpaper. Vacuum or rinse away any residue. Wipe surface with a tack cloth immediately before painting to remove dust.

**WARNING! LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE.**

**PRODUCT APPLICATION (cont.)**

**APPLICATION**

Use when temperature is between 10-32°C and humidity is below 85% to ensure proper drying. Properly ventilate the area by opening windows or using fans. Thoroughly mix Part B to ensure any settled pigment is re-dispersed. Add Part A to Part B and mix thoroughly for 1 minute. Thin no more than 10% (85mL per 946mL) with 100% isopropyl alcohol (not rubbing alcohol), acetone or xylene. If less than a full (1 quart) kit is needed, mix in a 4:1 ratio of base to activator in a separate container. Apply within 6 hours of mixing.

**Brush:** Use a fine quality, fine bristle varnish brush. Brush in one direction only for a smooth surface and feather the edges as you paint to avoid a hard line between painted areas. Avoid excessive brushing to ensure an even coat and smooth finish. Apply two coats, waiting at least 1 hour between coats. If necessary, a third coat may be applied the next day with a second kit.

**Roller:** Use a high quality, 6.4mm short nap roller made for kitchen or bath use. Apply two coats, waiting at least 1 hour between coats. Avoid excessive brushing to ensure an even coat and smooth finish. If necessary, a third coat may be applied the next day with a second kit. If desired, conventional HVLP or airless sprayer may also be used.

**DRY and RECOAT TIMES**

Based on 21°C and 50% relative humidity. Allow more time at cooler temperatures. Small bubbles will appear on the surface as you paint. As the paint dries, the self leveling properties will eliminate these bubbles. Dries to the touch in 1 hour. Allow to dry at least one hour before applying a second coat. Allow to dry 3 days before exposing to water.

**CLEAN-UP**

Clean brush and other application tools immediately with lacquer thinner or isopropyl alcohol. Properly dispose of all soiled rags. Properly discard empty container. Do not burn or place in home trash compactor.

• TRUSTED QUALITY SINCE 1921 • <b>RUST-OLEUM</b> SPECIALTY	<b>TECHNICAL DATA</b>	<b>SPC-122</b>
<b>RUST-OLEUM®</b> <b>TUB &amp; TILE REFINISHING KIT</b>		

### PHYSICAL PROPERTIES

		TUB & TILE REFINISHING KIT
<b>Resin Type</b>		Epoxy Acrylic
<b>Pigment Type</b>		Titanium Dioxide
<b>Solvents</b>		Ethyl Benzene, Light Aromatic Naphtha, Propylene Glycol Monomethyl Ether, 1,2,4-Trimethylbenzene, 1,3,5-Trimethylbenzene, Xylene
<b>Weight</b>	<b>Per Gallon</b>	9.9 lbs.
	<b>Per Liter</b>	1.19 kg
<b>Solids</b>	<b>By Weight</b>	54.6 %
	<b>By Volume</b>	44.4 %
<b>Volatile Organic Compounds</b>		540 g/l (4.50 lbs./gal.)
<b>Recommended Dry Film Thickness (DFT) per Coat</b>		1.5-2.0 mils (37.5-50µ)
<b>Wet Film to Achieve DFT (unthinned material)</b>		3.5-5.0 mils (87.5-125µ)
<b>Practical Coverage at Recommended DFT (assumes 15% material loss)</b>		2 coats covers 6.5-10.2m <sup>2</sup> /kit or 2 coats on a standard bathtub
<b>Pot Life</b>		Up to 6 hours
<b>Dry Times at 21-27°C and 50% Relative Humidity</b>	<b>Touch</b>	1 hour
	<b>Recoat</b>	1-2 hours
	<b>Full Cure</b>	3 days
<b>Dry Heat Resistance</b>		NA
<b>Shelf Life</b>		3 years
<b>Flash Point</b>		26°C
<b>Safety Information</b>		For additional information, see SDS
