Accommodation (SDA)
**High Physical Support
Design Product
Solutions**

Your partner for Specialist Disability Accommodation (SDA) solutions

The Bunnings Commercial team is here to service you from the front gate to the back fence. We are committed to bringing you the most trusted brands that specialise in products tailored specifically for individuals living with a disability and supportive of Specialist Disability Accommodation (SDA). Across all building stages we've got you covered for your SDA High Physical Support projects.

With over 130 years of supplying building and hardware solutions, Bunnings can supply everything from timber frames and trusses, to flooring, joinery, kitchens, appliances, commercial grade windows, façades, plumbing, lighting and more to cover all elements of an SDA High Physical Support design. We're much more than a supplier, we're your partner. In addition to all the specialist products required for an SDA build.

Apollo SDA

Member of the SDA Alliance

As a national peak body, the SDA Alliance represents SDA market participants across the country. We aim to drive better housing outcomes for people with disability that enhance independence, wellbeing, and quality of life. Our members include SDA providers, institutional investors, developers, builders, financial institutions, allied health professionals and industry consultants. Our members make a significant impact on the lives of people with disability- by providing housing that is safe, innovative and designed to serve the needs of SDA participants.

Leading Brands

fienza

Established in 2009, Fienza is a leading Australian brand that aims to be known for beautiful, quality products that are backed by industry leading warranties. They provide a range of functional and stylish solutions for bathroom accessibility, offering a broad selection of products meeting crucial AS 1428.1 requirements. Choose from a variety of finishes to create an elegant and sophisticated bathroom space with Fienza products.

Livigy have developed Bunnings exclusive packages of Smart Assistive Technology to cater to various needs, offering scalability and adaptability. From basic setups for essential assistance to advanced systems for enhanced support and automation, their products can be seamlessly integrated and upgraded. Each pack is sold pre-configured, with 24/7 phone support for remote commissioning and available installation services for a hassle-free setup.

Environmental, Social and Governance at Bunnings

Responsible sourcing

At Bunnings, we're committed to ensuring the products we sell, come from legal and sustainable operations, with good working conditions and fair treatment of people. As such, we continue to pursue sustainability by striving to make them socially responsible, environmentally aware and economically viable.

Sustainability

We are also committed to helping customers live more sustainably, and we are proud of the role we play in supporting local communities to make a positive difference. We recognise that our business plays an important role in reducing carbon emissions and addressing climate change. We have a comprehensive roadmap in place to reduce our energy consumption and to transition towards using more renewable energy sources.

In our Community

Bunnings is committed to participating in the communities in which we operate by contributing to local, regional and national causes, charities and organisations throughout Australia and New Zealand. We provide ongoing assistance to a wide range of local community groups including schools, sporting clubs and service clubs.

High Physical Support

Specialist Disability Accommodation (SDA) with the design category of High Physical Support is designed for individuals with significant physical impairments who require substantial support in their daily lives. These accommodations are designed to empower people who require support to complete one or more self-care or self-management activities.

High Physical Support housing incorporates the features of fully accessible housing, with additional specialised design features to support a higher level of physical access.

This type of accommodation is tailored to focus on independence and safety, featuring structural provisions like wider doorways, ramps, and custom bathroom fittings to accommodate wheelchairs. Additionally, these homes often include assistive technology such as ceiling hoists,

emergency power supply, and environmental control systems that may be operated by the resident.

The goal of High Physical Support SDA is to create a living space that not only meets the physical needs of the residents but also aims to promote their dignity and quality of life.

The design of these homes adheres to strict standards to ensure they are well-suited for their intended purpose.

When building to the SDA High Physical Support standards, additional consideration will need to be given to the selection of many materials and products, including:

- Entry ways, doors and door furniture, including automation
- Front-of-wall plumbing and tapware
- Emergency power solutions
- Adjustable joinery and benchtops
- Appliances

DOORS & DOOR HARDWARE

Introduction

Entrance Doors

External Doors

Internal Doors

Door Hardware

Introduction

The SDA Design Standard specifies the following door and door hardware requirements for High Physical Support builds*:

- Doorways should have a minimum opening clearance of 950mm and have door handles installed at between 900mm to 1100mm above the finished floor level
- All internal doorways should have a level, stepfree transition and threshold (maximum vertical tolerance of 3mm vertical or 5mm between abutting surfaces is allowable provided the lip is rounded or bevelled)
- Door automation can be provided in lieu of door circulation spaces that are required as per AS1428.1 to the latch side of the door

*The NDIS SDA Design Standard (SDA) must be consulted with respect to design and compliance requirements. The products presented in this catalogue also rely on correct installation to meet the requirements of AS1428.

FLOOR & WALL LININGS

Introduction

Floor Tiles

Vinyl Flooring

Wall Linings

Introduction

The SDA Design Standard specifies the following requirements for High Physical Support builds*:

- All flooring for bathrooms, kitchens and laundries must be tested to a minimum slip resistance rating of P3 or R10
- Carpeting must meet a requirement of a maximum total height of 15mm

*The NDIS SDA Design Standard (SDA) must be consulted with respect to design and compliance requirements. The products presented in this catalogue also rely on correct installation to meet the requirements of AS1428.

ELECTRICAL

Introduction

Switches

Lighting

Inline Exhaust Fans

Introduction

The SDA Design Standard specifies the following Electrical requirements for High Physical Support builds*:

- Light and power outlet switches should be rocker action, toggle or push pad in design with a minimum width of 35mm
- Dimmable lighting switches should be provided in living areas and bedrooms
- Task lighting should be provided above workspaces. A minimum level of 300lux should be achieved when tested at maximum intervals of 1500mm, directly over the surface of the benchtops

*The NDIS SDA Design Standard (SDA) must be consulted with respect to design and compliance requirements. The products presented in this catalogue also rely on correct installation to meet the requirements of AS1428.
