HomeCare by Caroma.
Where style meets functionality.

Discover the practicality and reliability of HomeCare by Caroma – a versatile, stylish assisted living bathroom collection that meets stringent standards. Enjoy the assurance of comfort and security with easy to use, functional bathroom products.

Backed by leading bathroom brand Caroma with over 80 years of Australian design and engineering experience, HomeCare by Caroma is a cohesive assisted living bathroom collection with matching grab rails, tapware and showers in four unique colours.

The collection can be expanded with our extended accessible compliant range across Opal & Tribute basins, Evolution Care kitchen sink, Care Support shower seats and backrests and Care sanitaryware options.

AUSTRALIAN DESIGNED AND ENGINEERED

Our products have been designed and stringently tested at our dedicated Design & Innovation Centre in Sydney

20 YEAR* WARRANTY

The HomeCare by Caroma Collection is built to last, with up to 20 years warranty

Find the right colour match for your bathroom with durable finishes including polished stainless steel, black and white across the grab rails and chrome, matte black and brushed nickel across tapware and shower (refer to the Product Details for specific colours available).

110KG

LOAD TESTED

HomeCare by Caroma Grab Rails and Rail Showers have been designed to withstand multi-directional forces of up to 110kg. Accessories that can be relied upon when they are truly needed.

AS1428.1 COMPLIANT

The entire HomeCare by Caroma Collection meets the stringent AS1428.1 requirements for accessible bathrooms.

*Available online or at the Special Orders desk

Choosing the right

Toilet Suite

Step 1. Select your toilet type

CONCEALED

The cistern is hidden inside the wall cavity leaving only the toilet pan to be seen. Concealed toilet suites are the latest in bathroom trends!

CLOSE COUPLED

The pan and cistern are joined together so you cannot see the flush pipe. The Caroma Uni-Orbital® Connector provides rotational positioning, allowing for more accurate suite alignment.

WALL FACING

The back of the pan sits flush against the wall leaving no gaps between the toilet and the wall. This style of toilet prevents dust or dirt falling behind the toilet, making it easier to clean!

CONNECTOR

A traditional looking toilet with the cistern joined to the pan by a plastic flush pipe. Because they are two-piece systems, Connector or Linked toilet suites give you the most flexibility in layout.

Step 2. Determine your inlet type and set out

UNIVERSAL TRAP PAN

A flexibile option that allows either an S Trap or P Trap installation.

P TRAP PAN

The toilet spigot is horizontal which connects directly into a pan collar mounted on the wall.

S TRAP PAN

The toilet spigot is connecting directly into the floor-mounted pan collar.

SET OUT DISTANCE

Measure the set out distance from the floor or wall to the centre of the waste pipe.

Step 3. Identify your cistern type

BOTTOM INLET CISTERN

The water enters the cistern via a hose connected into the bottom of the cistern.

CONCEALED CISTERN

A hidden cistern that is installed in a wall, roof cavity or under a bench top.

BACK ENTRY CISTERN

The water enters directly into the back of the cistern with the hose hidden from view.

EASY HEIGHT PAN

Easy Height pan providing extra comfort for those with ambulant Disabilities or Restricted Movement

CAROMA SUPERIOR HYGIENE

CAROMA

GERMGARD®

A unique antimicrobial formula that kills harmful bacteria, preventing the spread of nasty germs.

CAROMA

CLEANFLUSH®

By removing the rim of the bowl, there is now nowhere for germs to hide, and by adding Caroma's flush and flow features, we've created a superior flushing performance that delivers a cleaner clean.

How to choose

Basins

Basin types

Wall, inset, semi recessed, above counter, under counter or vanity basin? Three, one or no tapholes? It all depends on the amount of room, styling, required functionality and how much space there is available. Use a tower basin mixer to match an above counter basin, or a mid basin mixer for a semi recessed basin.

STAIN RESISTANT

ACCESSIBLE

VITREOUS CHINA

All Caroma basins includes white plug and chrome flush fitting waste and basins with overflow includes a chrome overflow ring.

- Crafted from highly durable vitreous china that has great durability, sanitary and stain resistant properties.
- Available in above counter, semi recessed, inset and wall basin styles.
- 20 year warranty.

WALL BASINS

Fixed directly to wall with brackets and doesn't require a vanity for installation. Ideal for saving space with a minimalist look. Enhance the basin with a pedestal or shroud to improve the finish of the bathroom as well as conceal plumbing.

INSET BASINS

The basin is installed into the vanity top, similar to vanity basins, but give the look of an above counter basin.

ABOVE COUNTER BASINS

Installed on top of vanity surface. Easiest to install, little requirement of tapholes or advanced plumbing. Ideal for tall people as the rims are positioned above waist level, and can also compensate for low counters in the bathroom.

VANITY BASINS

Installed with a flush fit into the top surface of the vanity. Rims are flared and slightly raised above the counter surface. This helps control spills and protect the counter's edge treatment. Most are drop-in to suit a pre-cut countertop.

SEMI RECESSED BASINS

Designed to give more usable vanity space, these basins overhang the vanity space.
