Our customers say it best

Plant Based Building Solutions (PBBS) is a Melbourne based landscaping business that specialise in sustainable landscape solutions. Led by owner and operator Jason McLean, his team delivers a range of commercial projects that enhance urban environments through greenlife.

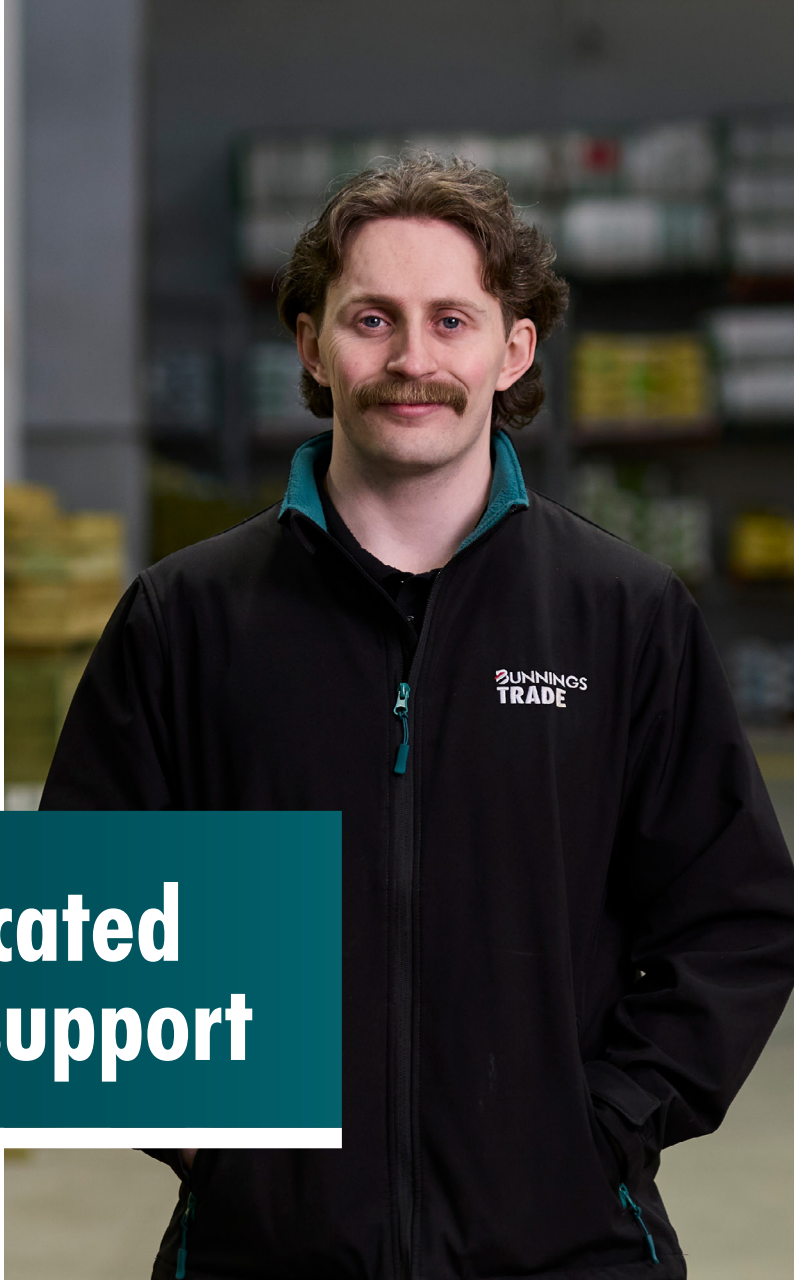

“My passion is putting greenery into urban spaces.” As the business continues to grow, reliable supplier support is essential and PBBS work closely with Bunnings Trade Landscape Specialist, Liam, who helps ensure the team has what they need to keep projects moving. From quoting and product sourcing to bulk deliveries, he supports them on projects from start to finish both locally and regionally.

“It’s great to have hubs where we can get deliveries wherever we are, and also that our crew can drop in and pick up supplies as they need. Liam understands our business and is invested in it. He’s genuinely interested in what we’re doing, and that makes life a lot easier.”

PBBS recently worked on a large scale landscaping project at Melbourne Airport, where Bunnings Trade supplied and delivered more than 750 nursery-grade plants.

“This is an exciting one for us because we’re putting plants in areas where plants don’t usually go” says Jason. “We’ve got 750 plants coming, but I can relax because I know the quality will be consistent across the board.” For Jason, the relationship is built on more than just supply. “It’s a good partnership for us having Bunnings. We rely on them a lot, and the reason we rely on them is because they’ve proven that we can.”
