TOOLS REQUIRED

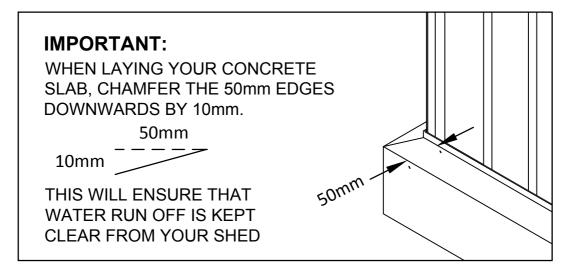

GENERAL INSTRUCTIONS

- Before commencing any assembly, read through these instructions in detail to gain a thorough understanding of assembly methods and associated details.
- Unpack the carton and carefully identify and check off all the parts against the parts described and illustrated on pages three and four.

SITE PREPARATION

- The site for the shed must be level.
- It is recommended that the shed be set on a 100mm concrete slab and anchored down appropriately (refer FINAL CONSTRUCTION page for details).
- Anchor sets are supplied as standard items with this product.

A NOTE ON SAFETY

- Some parts may have sharp edges. It is advisable to wear gloves when handling these items and safety glasses if drilling holes. Sensible shoes are highly recommended.
- Do not erect your shed in windy conditions, ensure that the shed is securely anchored to a solid foundation immediately after construction is completed.
- It is highly recommended to erect the shed with two or more people.

SHED MODEL: J30152MK 06-10-2017

INSTRUCTIONS FOR JOINING SPLICED CHANNELS

NOTE: THE TEXT MARKED ON ALL PARTS MUST BE SHOWN ON THE SAME SIDE AS EACH OTHER.

STEP 1.

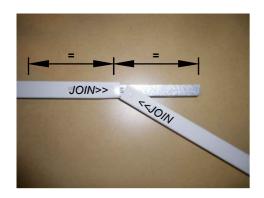

Position the channels and the CSJ joiner channel so the center of the CSJ is in line with the end of each channel to be joined together.

JOIN>>

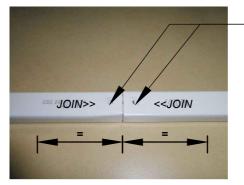

STEP 2.

Join the first channel to the CSJ by inserting the center of the CSJ (on an angle) to the end of the channel where the JOIN>> text is marked. Push down one side of the CSJ until you hear a 'click'.

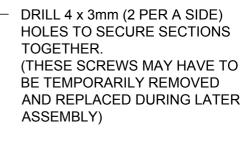

STEP 3.

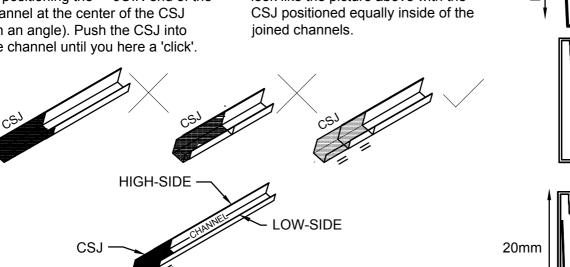

Join the second channel to the CSJ by positioning the <<JOIN end of the channel at the center of the CSJ (on an angle). Push the CSJ into the channel until you here a 'click'.

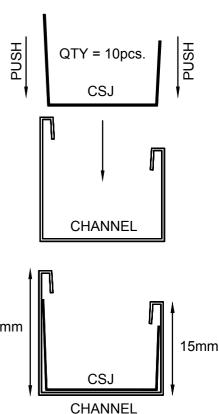

FINISHED CHANNEL

The joined channels should now look like the picture above with the

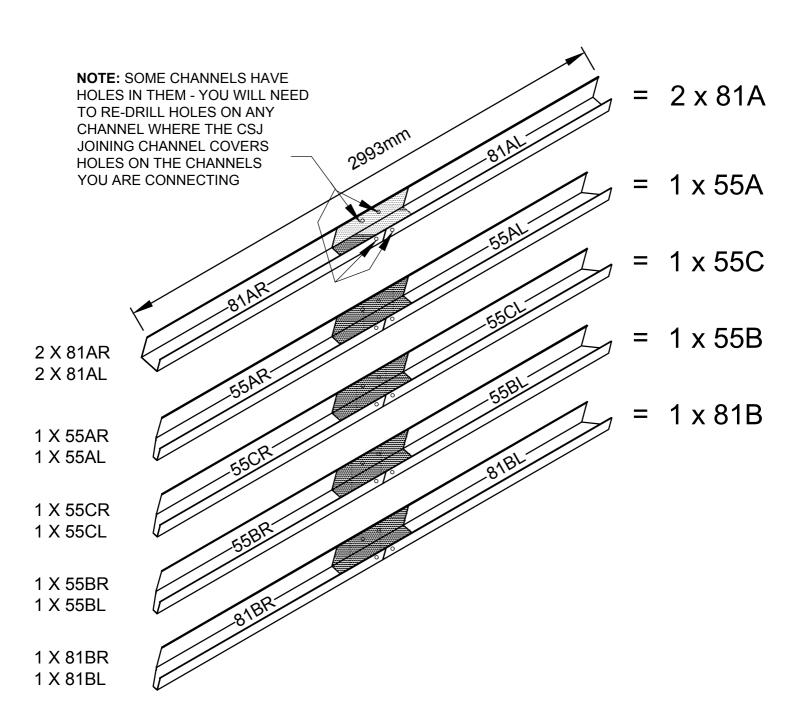

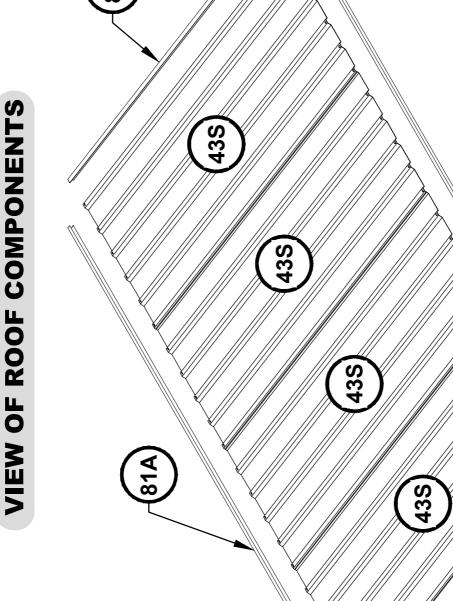

STEP 1. PRE-ASSEMBLY OF SPLICED CHANNELS

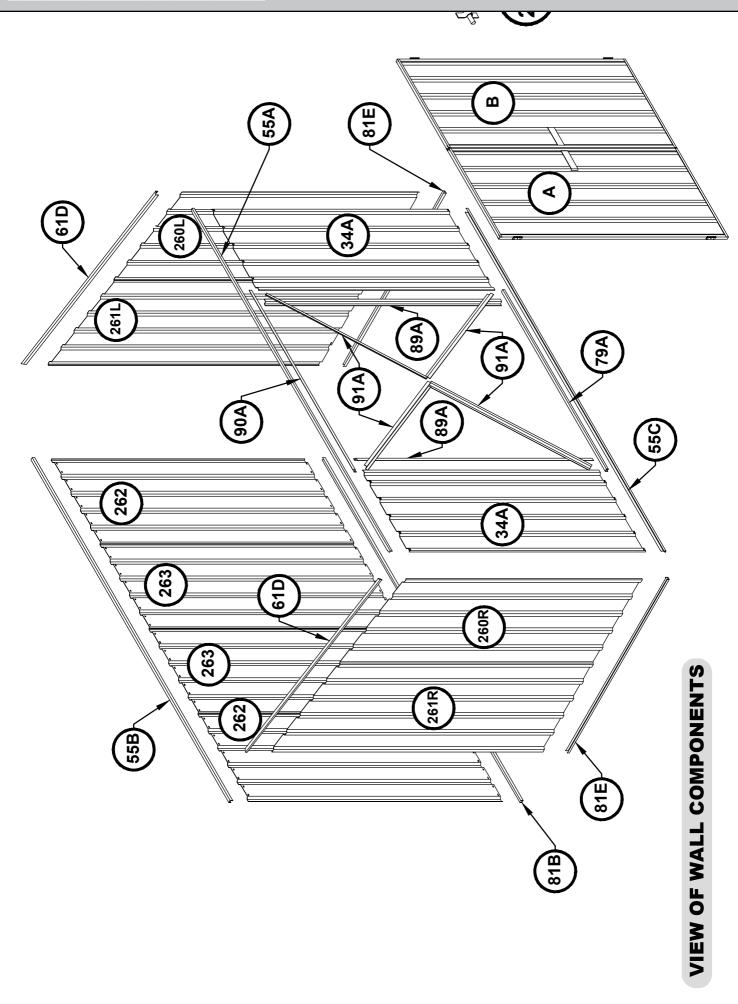

NOTE: JOIN TOGETHER 12 X CHANNEL SECTIONS USING 6 X CHANNEL JOINERS (PART CSJ)

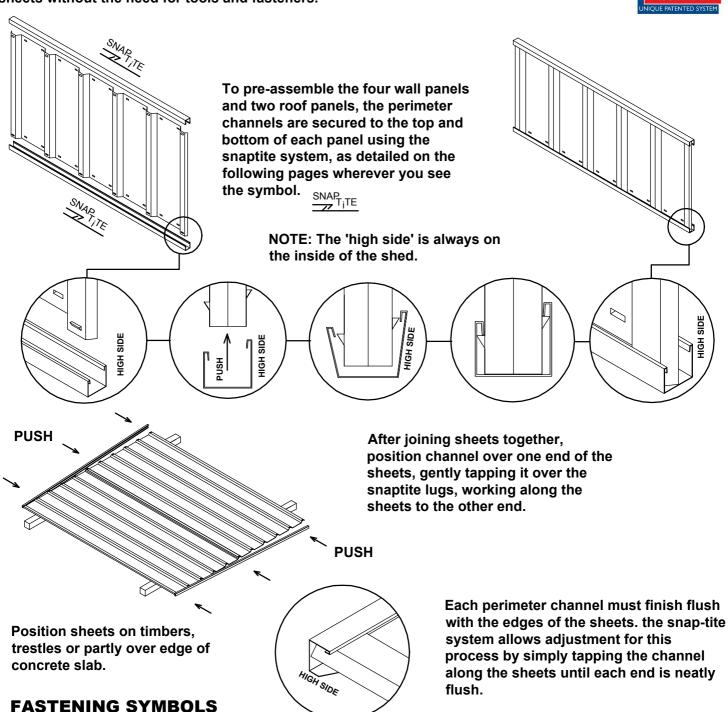

ASSEMBLY INTRODUCTION

The snap-tite assembly system locks most perimeter channels to all roof and wall sheets without the need for tools and fasteners.

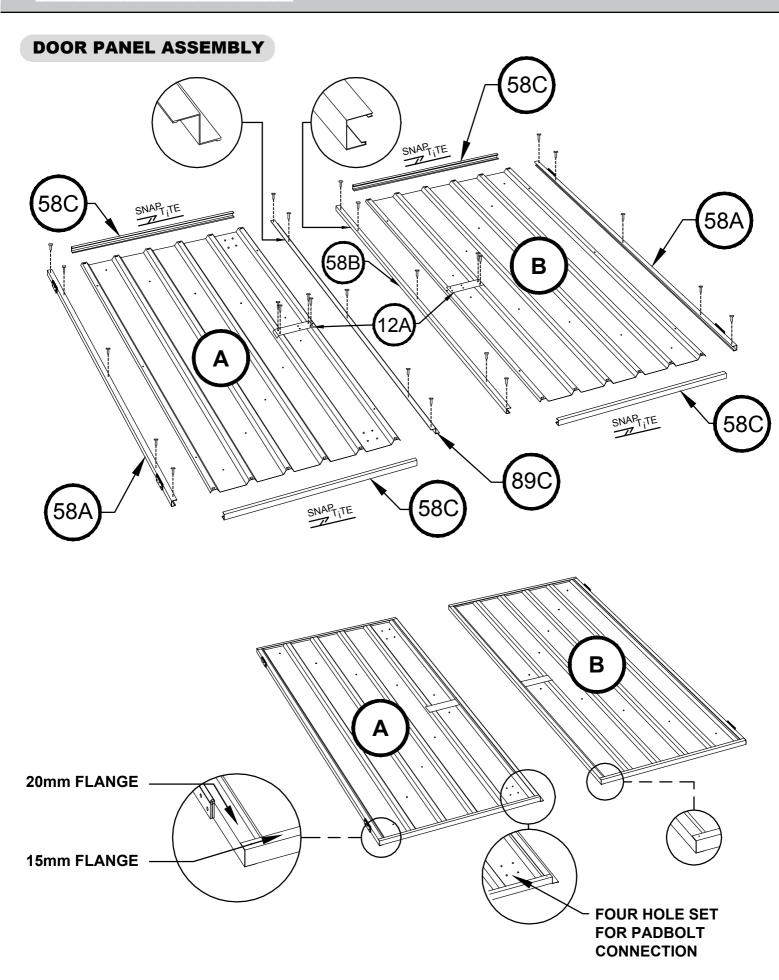

Join components together with one screw at this location only, as some channel sections have extra holes that are not required for this model of garden shed

3mm POP RIVETS 4mm NUT & BOLT SET

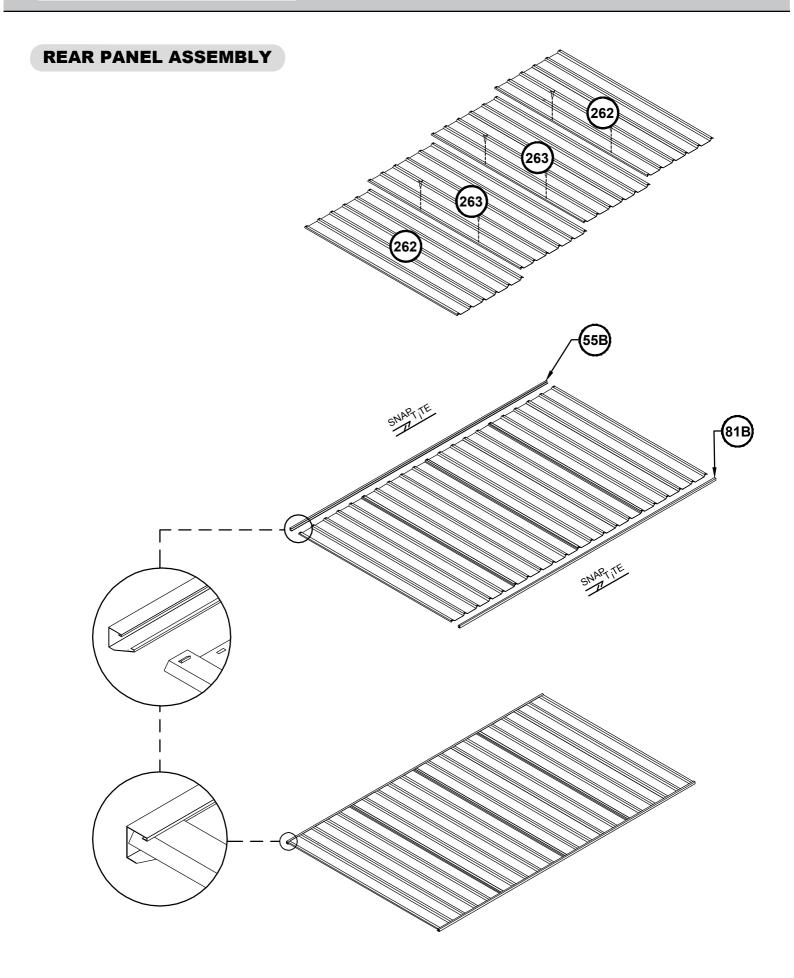

Do not join components together at this location yet, as the screw may obstruct further assembly of other components

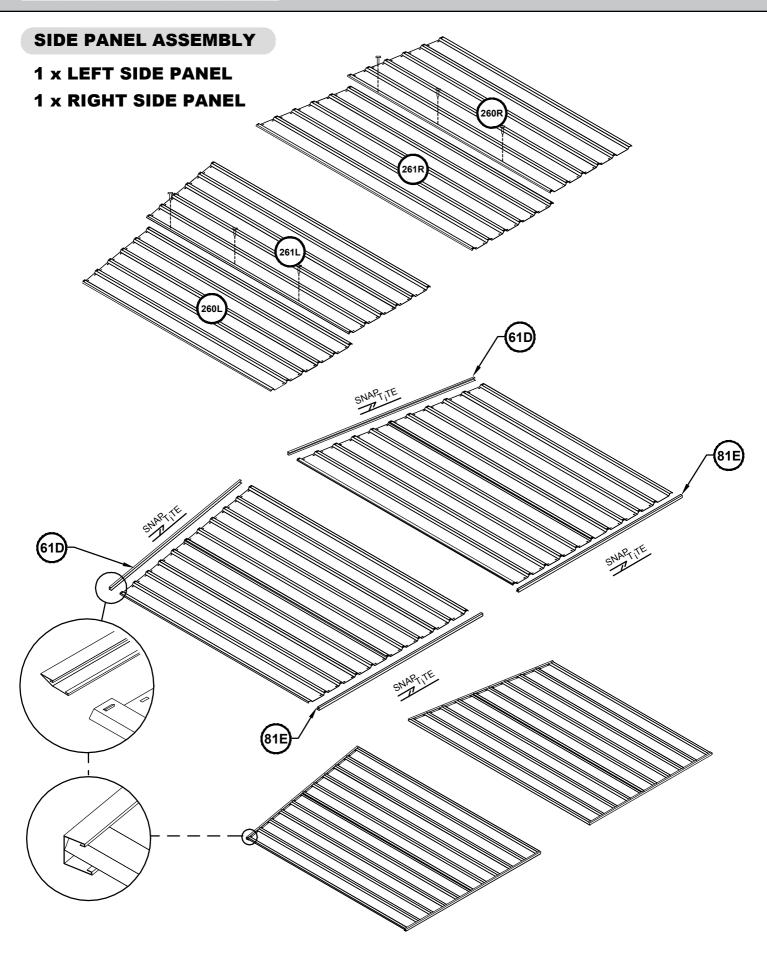

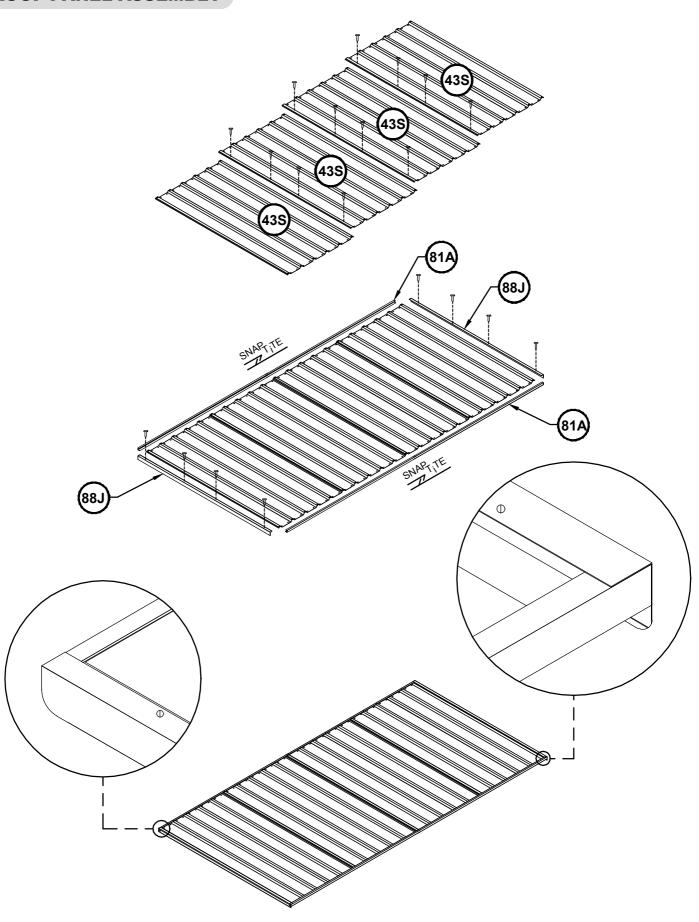

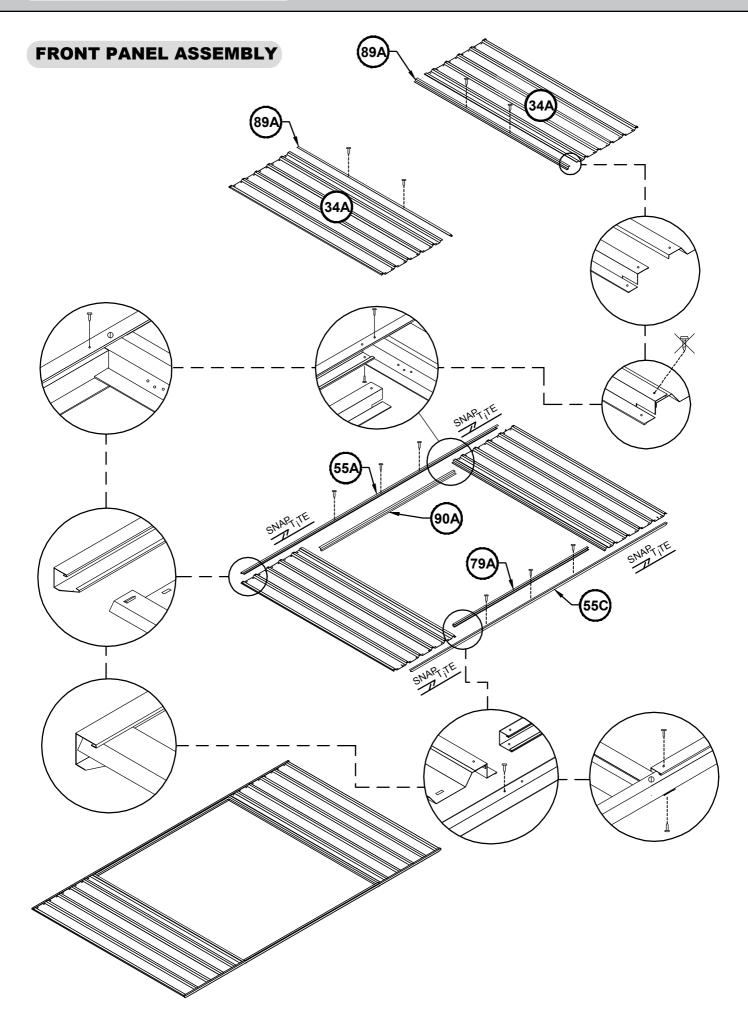

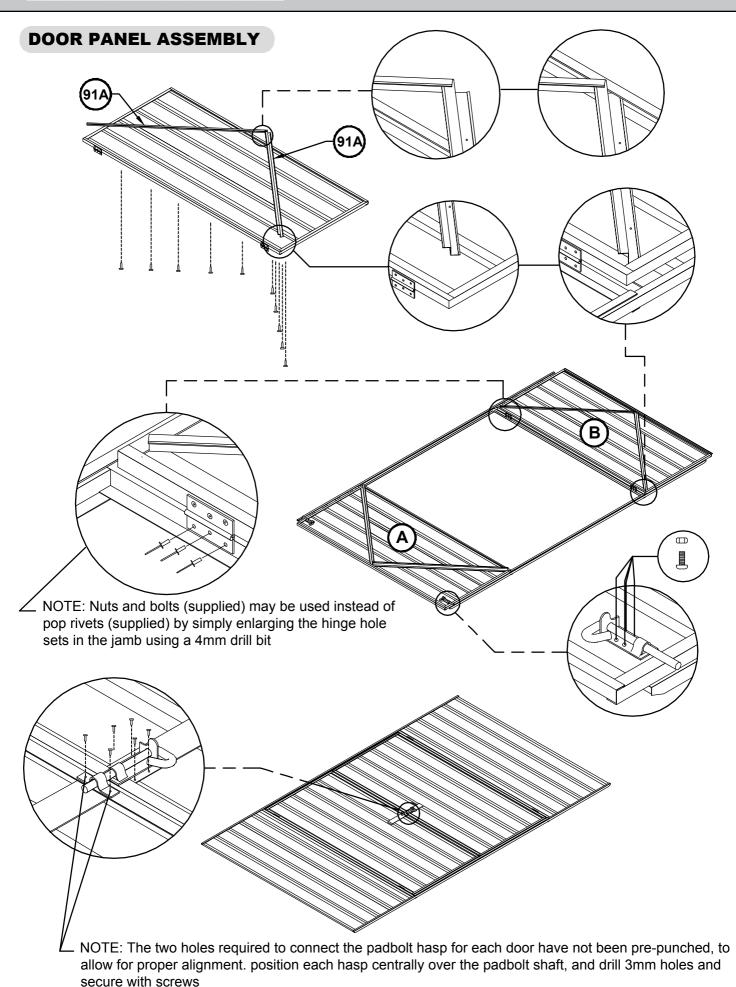

ROOF PANEL ASSEMBLY

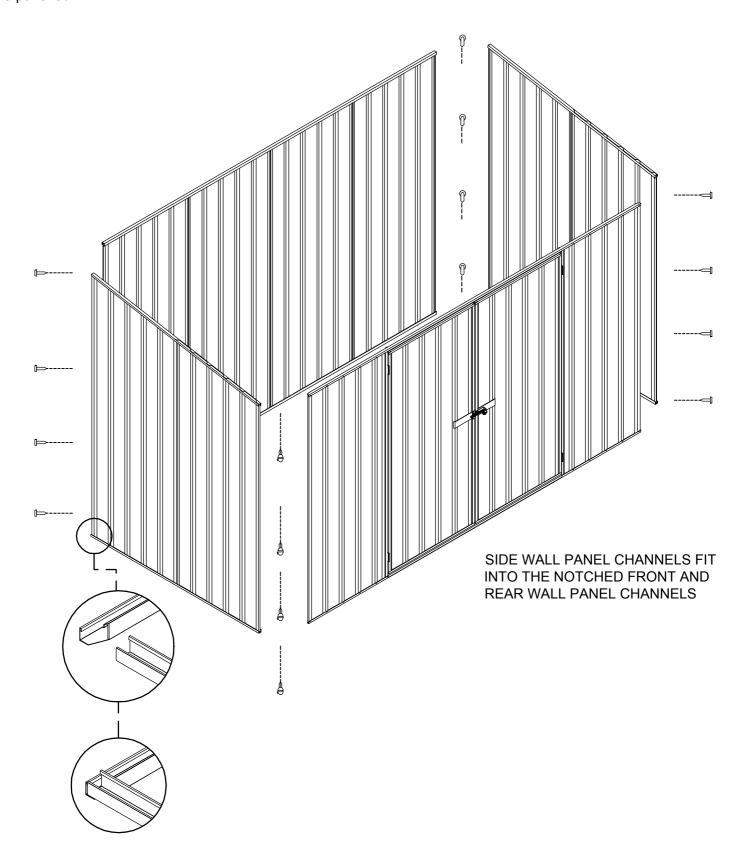

PANEL CONSTRUCTION

NOTE: Take care to ensure that both front and rear wall panels are not positioned upside down. The top channel of each panel is pre-punched for attaching roof sheet. The base channels are not pre-punched.

FINAL CONSTRUCTION ANCHORING OF SHED **LOCATION OF 12 CONCRETE ANCHORS** WALL **BOLT & NUT** SHEET **STEEL** - EACH ANCHOR CONSISTS OF ONE NUT, BOLT, ANGLE 🚝 DYNABOLT AND STEEL ANGLE **SLAB** - DRILL A 10mm HOLE INTO THE WALL SHEET - DRILL A 10mm HOLE INTO THE CONCRETE

DYNABOLT

AUSTRALIAN PRODUCT WARRANTY AGAINST DEFECTS

Congratulations on your purchase of an GARDENPRO SHED

GARDENPRO SHEDS, including garden sheds, garden beds, aviaries, storage units, garages, awnings and carports are made using high quality Australian made steel.

We are pleased to advise we warrant that the steel coating will not rust, crack, flake peel or blister for 20 years from date of purchase, when installed within Australia.

This warranty does not apply to surface deterioration of panels caused by 'Swarf" (Tiny particles of steel debris left from cutting, grinding or drilling operations) that has not been removed after building construction, or as a result of contact with damp soil, chemicals, fertilisers or other corrosive substances.

This warranty covers any GARDENPRO product used for normal domestic use and installed in accordance with the installation instructions. The warranty does NOT cover Damage caused by storms, wind, rain snow or poor foundations.

This warranty does NOT cover GARDENPRO products installed in severe coastal, industrial or other highly corrosive environments. The warranty does not cover fasteners (screws, nuts, bolts, rivets, hasps or bolts).

The warranty is limited to replacement and delivery of components and does not include any labour or installation costs. The benefits given by the warranty are in addition to your other rights and remedies under a law in relation to the goods or services to which the warranty relates.

The warranty applies to the exclusion of all other representations, guarantees or warranties express or implied, our goods come with guarantees that cannot be excluded under the Australian consumer law and is not transferable. You are entitled to a replacement or refund for a major failure and for compensation for any other foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of an acceptable quality and the failure does not amount to a major failure. For further information go to http://www.consumerlaw.gov.au.

Please retain a proof of purchase (sales docket or invoice) or register your warranty within 30 days of purchase here: http://gardenprosheds.com.au/register-warranty/

In the unlikely event a warranty claim is made, it must be supported by photographic evidence and details of the defect, including component part numbers, together with proof of purchase documentation (or on-line registration of purchase) and forwarded to the address below. Upon receipt of the warranty claim, the Customer Service Manager will contact you within three business days to advise you of the assessment outcome of the claim, which may include your expenses incurred in making the claim.

THE CUSTOMER SERVICE MANAGER, GARDENPRO INDUSTRIES, PO BOX 119 ACACIA RIDGE QLD AUSTRALIA 4110

GARDENPRO ASSEMBLY INSTRUCTION MANUAL SHED MODEL: J30152MK 06-10-2017 **PAGE 19**

GARDENPRO SHEDS - STORAGE GUIDELINES

GARDENPRO SHEDS include garden sheds, garden beds, storage units, aviaries, garages, awnings and carports.

GARDENPRO SHEDS are designed to be weatherproof for normal weather conditions. In the event of extreme weather conditions such as heavy rain, combined with high wind gusts, the ridge capping, sheeting joins, screw fixings etc., may exhibit minor deformations which may allow some water entry. These areas should be checked regularly to ensure that maximum strength and protection is maintained.

Other weather conditions such as extreme heat and extreme cold, moist or dry air can influence the effects of concrete floor moisture and/or condensation on the underside of the roof sheets.

GARDENPRO SHEDS and storage units are primarily used for storage of garden equipment such as lawnmowers, wheelbarrows, garden tools etc. Storage items that might be adversely affected by any of the above conditions may require additional protection such as being sealed or covered by plastic sheets and/or stacked above the concrete floor on timber slats.

Waterproof sealants may be used to offer further protection where required around joins and screw fixings, as can rubber door seals and other products which are available from most hardware outlets.

Placement of waterproof sealants (silicone) between the base of the shed and concrete slab is not recommended, as this process can have a reverse effect, preventing excess water from escaping, resulting with water accumulating and being trapped inside the shed.

GARDENPRO accepts no responsibility for water entry, floor moisture, condensation or the condition of the Contents inside your GARDENPRO steel building arising from any of the pre-mentioned weather conditions.
