Responsible Sourcing

As a leading retailer of home improvement and outdoor living products, Bunnings is committed to ensuring all timber and wood products originate from legal and well-managed forest operations. To reduce the impacts to nature and biodiversity associated with the procurement of timber products, Bunnings' Responsible Timber Sourcing Policy seeks to exclude sources derived from deforestation and natural forest conversion. This is achieved by requiring that all natural forest timber products originate from independently certified forests in line with the Forest Stewardship Council® (FSC®), Programme for the Endorsement of Forest Certification (PEFC) or another equivalent standard.

SpecRite Merbau Decking

TIMBER | MERBAU

Merbau is a popular choice for decking as it is cost effective and requires much less maintenance than some other hardwoods. It is durable and well regarded for its high usability, resistance to termites and exceptional resilience. Since Merbau is not as hard as some timber species, it is easier to work with and can easily be cut, allowing you to meet more complex design requirements.

Bunnings supplies the **SpecRite** range of Merbau decking. **SpecRite** specialises in high quality timber products for a range of applications, including decking. **SpecRite**'s Merbau timber is not only selected for its premium finish but also for its high dimensional stability, reducing the likelihood of distortion over time. And choosing Merbau doesn't mean sacrificing sustainability. The **SpecRite** range includes FSC® certified Merbau options, supporting responsible forestry practices.

SpecRite Merbau decking is pre-oiled with Feast Watson industrial Timber Oil for protection against moisture and UV and is ready for top-coating, saving time on installation. It is also approved for use in bushfire-prone areas, compliant to BAL 29.

SpecRite Merbau Decking

- Strong and resilient with a timber durability rating of C1
- Naturally resistant to decay, weathering, mould, fire and termites
- Pre-oiled to save time on installation

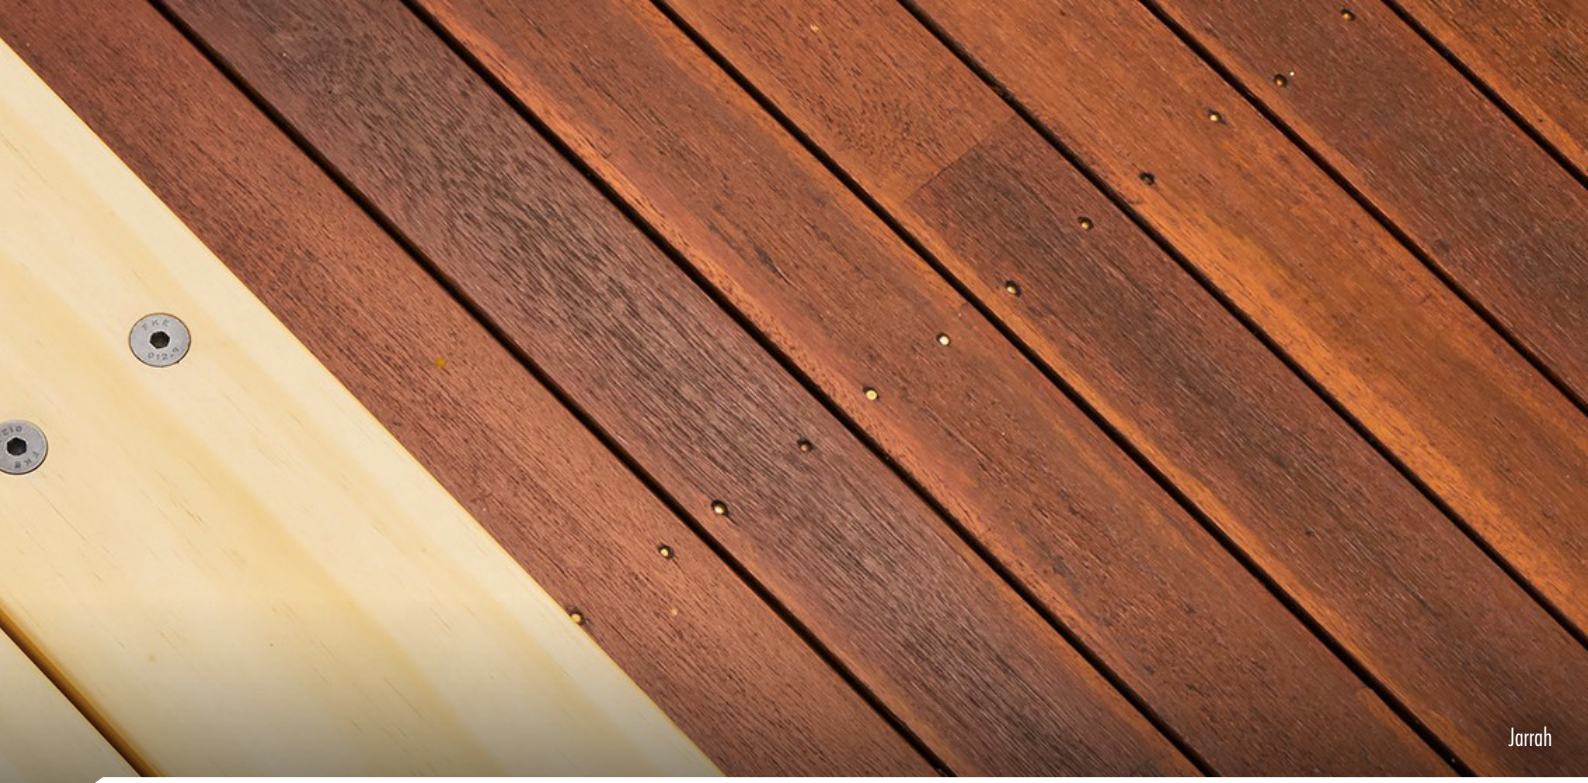

Deck SpecRite™ Manufactured For Results.

FSC® www.fsc.org FSC® N001889

What is the FSC® logo?
The FSC® logo identifies products from forests that are certified against a set of strict environmental, social and economic standards in accordance with the rules of the Forest Stewardship Council®. Bunnings currently offers a wide range of FSC® certified products, including an exclusive range of FSC® certified outdoor leisure timber products. Look for our FSC® certified products throughout.

Timbers vary by state and territory; contact your local store for further information. All pools and pool fencing must conform to your local authority's safety regulations and guidelines. *Standards Australia AS 5604-2005. The FSC® label identifies products that come from responsibly managed forests, certified to rigorous environmental, social and economic standards set by the Forst Stewardship Council®. FSC is a global not-for-profit that promotes responsible forest management, safeguarding biodiversity and upholding the rights of the workers, local communities and Indigenous Peoples. Certification is regularly audited to ensure compliance. You can check the current certification status of our SpecRite Merbau supplier at any time by visiting the FSC Search at search.fsc.org/en/ and entering Licence Code: FSC®-128536.

Home

Jarrah

TIMBER DECKING SPECIES

Treated Pine

Treated Pine decking is a cost-effective and easy-to-work-with decking solution, and is a great choice if budget is tight.

Although it is a softwood that is naturally decay resistant, with the potential to be termite resistant, it does need to be sealed adequately to avoid the early onset of decay.

It can be painted or stained to match almost any colour scheme, allowing for a more uniform finish to a project.

- H3 treated
- Timber durability rating of C1 (above-ground)
- Cost effective
- Easy to work with
- Resistant to decay and termites

Jarrah

Jarrah is a sought-after timber produced in Western Australia, known for striking colours ranging from light to deep red to burgundy.

Its durability and strength, yet relative ease to work with makes it an ideal timber for decking.

- Timber durability rating of C2 (above-ground)
- Naturally resistant to decay, weathering, mould, fire, and termites

Treated Pine

Home

Blackbutt

TIMBER DECKING SPECIES

Spotted Gum

Spotted Gum, another Australian native timber, has similar properties to Jarrah but with a much warmer and diverse colour palette that ranges from light golden brown to a rich chocolate dark red/brown, designed to complement any outdoor design.

- Timber durability rating of C1 (above-ground)
- Naturally resistant to decay, weathering, mould, fire, and termites
- Pre-oiled to save time on installation

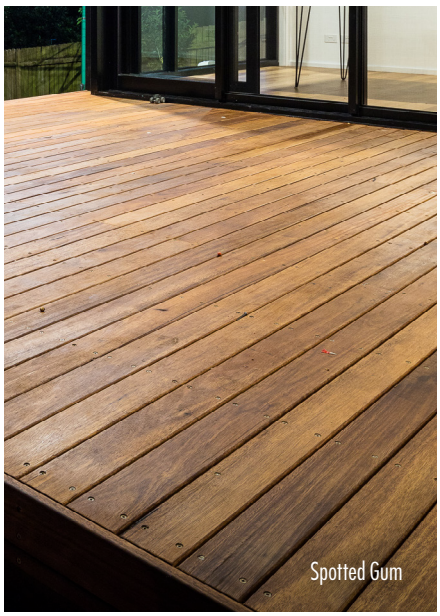

Blackbutt

Blackbutt is a strong and durable hardwood, which means it can be used for a range of interior and exterior applications.

Blackbutt decking ranges in colour from a golden yellow to pale brown colouring with an occasional slightly pink undertone.

Blackbutt is suitable up to and including BAL29 rated areas, being naturally fire and termite resistant.

- Timber durability rating of C1 (above-ground)
- Cost effective
- Easy to work with
- Naturally resistant to decay, weathering, mould, fire, and termites

Parkside Timber

OUR TIMBER DECKING SUPPLIERS

Being a national timber decking retailer, Bunnings partners with producers across the country to provide our customers with choice, accessibility and everyday low prices. We select our partners with great care, ensuring that our Responsible Timber Sourcing Policy is upheld by our partners. Our timber decking suppliers include:

Parkside Timber

Parkside Timber has a proud history of producing some of the finest quality hardwood timber products for generations. **Parkside Timber** decking and screening are pre-oiled, providing better protection during transport, site storage and installation. With less preparation required before and after installation, you can get the job finished faster, saving valuable time and money.

Pentarch Forestry

Pentarch Forestry, a division of **Pentarch Holdings**, is a prominent name in the forestry sector of Australia and New Zealand. With a commitment to sustainability and excellence, they provide a range of certified and sustainable Australian-made and inspired hardwood products including decking, flooring, cladding, lining and structural timber. Their state-of-the-art log management system ensures efficient tracking of products through the supply chain, affirming their position as a leader in the forestry industry.

TIMBER | MODULAR

Good Times Decking offers a prefabricated modular solution designed for building over all surfaces and in particular, existing slabs or waterproofed areas. Pre-engineered with self-levelling supports, it provides a fast and cost-effective solution when building a deck.

The systems are comprised of prefabricated structural base frames sourced from H3 treated pine, offering an easy-to-assemble decking solution that removes the need for digging foundations.

Choose from a range of decking panel materials and colours which suit our standard modular system or lay your own long length decking over our custom modular system.

- No digging foundations
- Adjusts to unlevel surfaces
- Saves time and money

COMPOSITE | MODWOOD

ModWood supply quality composite decking and fencing products to homeowners, builders and architects throughout Australia. Their Australian-made decking range combines stylish form with practical function, making it the perfect solution for both commercial and residential applications. Made from a combination of plastic and recycled wood, it offers long-lasting, great performance. The boards contain approximately 90% recycled or reclaimed materials and don't feature chemicals that leach out and damage the environment.

ModWood's composite decking comes in a range of sizes, colours and finishes. It is versatile, easy to install and looks great in any setting. **ModWood** decking's durability and resistance to the toughest Australian weather conditions make it a great, low-maintenance alternative to conventional timber.

- Anti-slip rating of up to R11 available
- Natural Grain Collection GreenRate - Level C certified by Global GreenTag(tm)
- Easy to install

EverDeck

COMPOSITE | EVERDECK®

Everdeck® by Timberlink® decking boards are designed to withstand tough Australian conditions such as harsh sun and UV exposure, as well as wet and damp environments. **Everdeck®** boards are manufactured in Tasmania from a combination of Australian recycled plastic and plantation pine timber residues such as wood shavings. They have an embossed grain finish for a natural timber appearance and are available in six modern colourways, with the decking boards being dual-coloured for versatility.

Additionally, **Everdeck®**'s concealed fastening system makes installation easy. Designed for fixing to a timber subframe, they provide a modern look, minimising visibility of fasteners.

- Engineered to provide warranty coverage for up to 20 years
- Installation resources available and suitable for professional installers
- Slip and stain resistant capped surface results in reduced maintenance

DecoDeck

DecoDeck

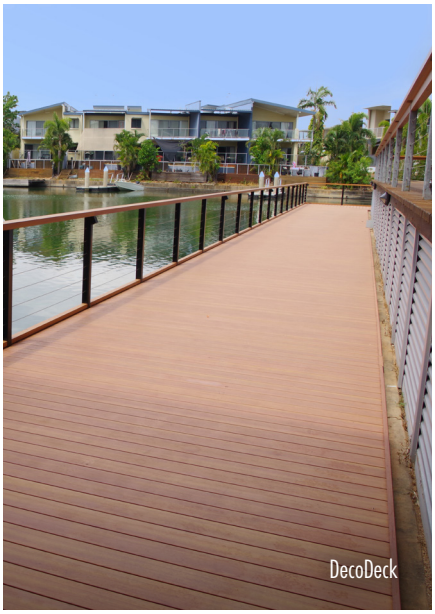

ALUMINIUM | DECODECK®

DecoDeck® combines the natural beauty of timber decking with the strength and durability of aluminium. A first in aluminium decking systems, **DecoDeck®** features the Super Durable™ DecoWood® wood grain finish, replicating the authentic feel and appearance of natural timber. Thanks to aluminium's great thermal qualities it dissipates heat quickly, allowing it to adjust to the ambient temperature and keeping it comfortable to walk on even under the hot Aussie sun.

DecoDeck® is quick and easy to install, helping complete projects faster. The patented system uses a simple hidden-clip to secure the decking boards, with colour-matched end caps or angles for edging and a unique **DecoDeck®** Joiner available to join boards between joists for less wastage and a seamless connection between boards.

DecoDeck® is non-combustible and has marine-grade durability, to ensure resilience in Australia's harsh environment.

- Easy to Install
- Resistant to decay, weathering, mould, fire and termites
- Available in two widths and a range of **DecoDeck®** timber finishes

Hardie Deck

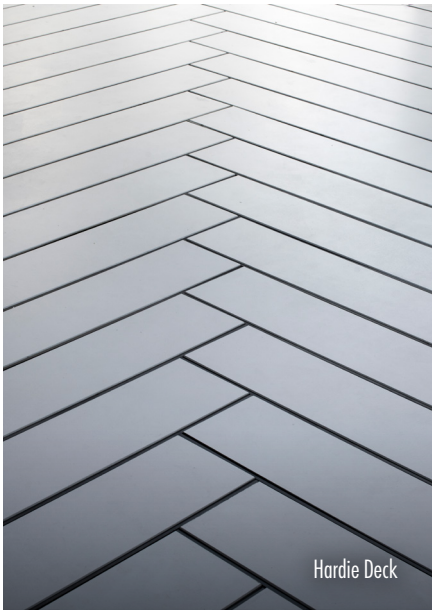

FIBRE CEMENT | HARDIE™ DECK

Hardie™ Deck is a low maintenance alternative to timber decking made from Hardie™ fibre cement that is resistant to damage from moisture and termites. **Hardie™ Deck** is also deemed non-combustible making it an ideal bushfire zone deck or fire pit deck. With concealed screws and solid, splinter-free boards, **Hardie™ Deck** feels smooth under bare feet.

Hardie™ Deck can be used as low as 150mm from the ground with adequate crossflow ventilation when installed with the **Hardie™ Deck** Concealed Fixing System. This fixing system is specifically designed to provide additional strength and durability, and to allow drainage and improve ventilation.

Clean lines and freedom of colour choice makes this fibre cement decking a stunning outdoor floor.

- Easy to Install
- Resistant to decay, weathering, mould, fire and termites
- Available in two widths and multiple colour options

ACCESSORIES | TIMBER POSTS

Through our national network of suppliers of H3 timber we are ideally positioned to provide you with the timber posts you need for your projects. We can supply an extensive range of treated pine and hardwood posts, well suited to match with timber decking.

Additionally, we supply specialised H4 outdoor timber posts such as **Woodhouse Terraframe®**.

Woodhouse TerraFrame® is a range of next-generation, outdoor structural timber products treated to H4 with Micronized Copper Azole (MCA) preservative and designed specifically for in-ground and on-ground applications that present a high risk of failure to conventional H3 treated outdoor timbers.

- Manufactured from FSC®-certified, solid Radiata pine
- Protected from rot, fungal decay and termite attack
- Kiln-dried and coated with a proprietary water-based penetrating oil
- Graded to MGP10
- 50-year guarantee.

ProtectADeck

ACCESSORIES | JOIST PROTECTION

Using joist protection when building a deck can extend the lifespan of the deck by preventing moisture from seeping into the joists, which can lead to rot and decay. Joist protection may also help to maintain the structural integrity of the deck, ensuring it remains safe and sturdy over time. By shielding the joists from water damage, it can also help in preserving the aesthetic appeal of the deck, keeping it looking new and well-maintained for longer.

Bunnings has a range of Joist Protection products available to safeguard the longevity of your decking job.

ProtectADeck

Home

ACCESSORIES | FIXINGS AND CONCEALED FASTENERS

Bunnings supplies an extensive range of products for fixing decking including screws, nails, clips, joist hangers, post anchors and hidden fasteners.

Many of the decking systems we supply have their own concealed fastening systems, such as **EverDeck®**, **EkoDeck® Quickfix**, **Hardie™ Deck** Concealed Fixing System, **ModWood KlevaKlip™** and **DecoDeck®**. These provide a modern appearance, minimising the visibility of fasteners and streamlining the look of a deck. These systems are designed to optimise the decking system they align to and allow for the natural expansion, contraction and movement of the decking boards.

Peak

ACCESSORIES | BALUSTRADING | ALUMINIUM

PEAK®

PEAK® Aluminium Balustrade is made from powder-coated aluminium for low-maintenance durability, with no sanding or staining required. Engineered to meet building code requirements*, it will not rot or rust, even in coastal environments, and is backed by a 20-year warranty.

The system has been designed for easy installation, allowing you to save time and money while achieving a professional result. This is a high quality and affordable system that's fully customisable and easy to install on outdoor decks, balconies and patios.

ProtectorAl

ProtectorAl balustrading has been engineered and manufactured to exceed the mandatory Australian Standards and Building Codes for Australia* AS1170. It is light, strong, durable and won't rust or rot.

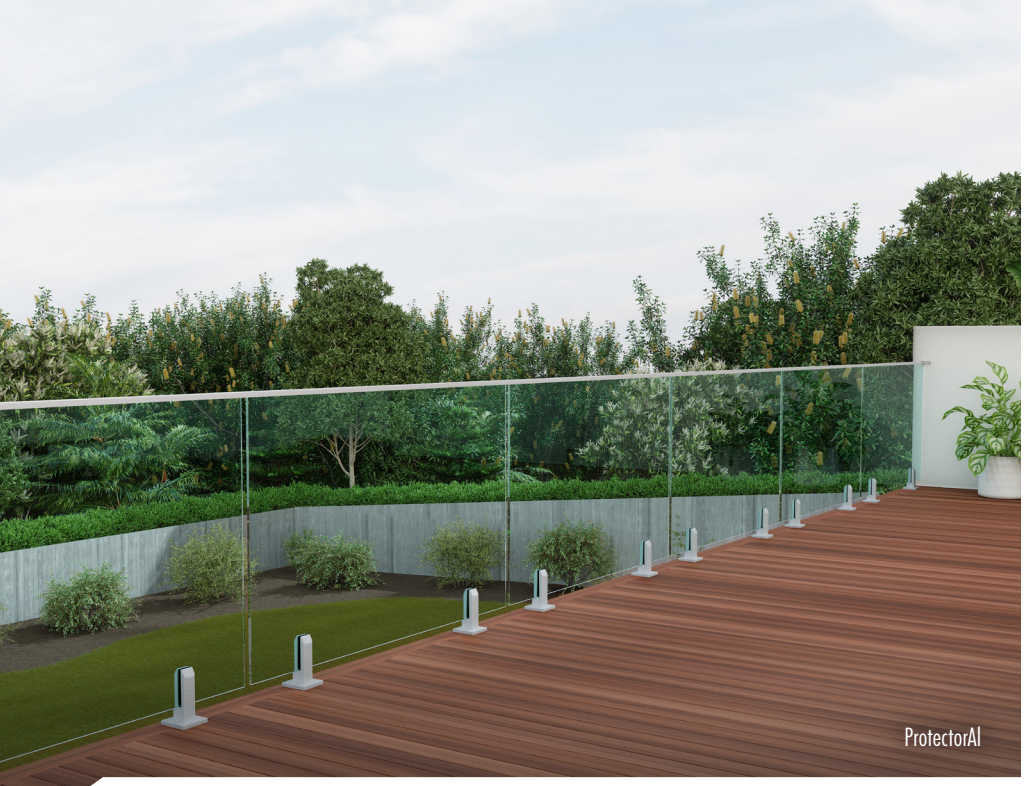

This product has been designed for superior strength, easy installation and maximum safety. The shorter spans provide a strong balustrade solution that is easy to install. This product can be custom ordered in a wide variety of sizes, styles and colours to meet your customer's needs. Raked panels are also available to allow for staircases.

**Building codes may vary. Always comply with the local council requirements.*
