

# Lithium-ion Battery Fire Products

Protect your workshop, family and home from the hazards of LiPo charging. Our range of lithium-ion battery fire products effectively contain small fires caused by mobile phones, laptops, power tools, e-scooter/e-bike and other devices powered by lithium-ion batteries.

## Fire Resistant Bag

I/N: 0531333

- + Ideal for cameras, toys, models and power tool lithium-ion batteries
- + Withstands temperatures up to 550°C
- + Provides high level of protection when re-charging
- + Will not burn, melt or allow flame penetration
- + Waterproof

## Fire Resistant Blanket

I/N: 0531331

- + Contains small fires caused by mobile phones, laptops, power tools and e-scooter/e-bike batteries
- + Withstands temperatures up to 1200°C. Higher than lithium battery combustion temperature (700-900°C)
- + Thickness up to 0.9mm, solid and durable, effectively resist battery explosion impact

## Fire Resistant Satchel

I/N: 0531330

- + Large capacity
- + Withstands temperatures up to 550°C
- + Suitable for devices such as mobile phone & tablets
- + Provides high level of protection when re-charging
- + Also suitable for important documents
