Statement on how the building product is expected to contribute to compliance:

B2 Durability
This product is a component within the plumbing services of a building, typically controlling the flow water at a terminus, is easy to access and replace, and failure would be easily detected during normal use.

E3 Internal Moisture
Surfaces of this product likely to be splashed or become contaminated during the intended use of the building, must be impervious and easily cleaned.

F2 Hazardous Building Materials
This product is constructed of materials that will not emit harmful concentrations of substances from exposed surfaces.

G1 Personal Hygiene
This product is a sanitary fixture constructed and designed to be installed to discharge to a plumbing and drainage system as required by G13 "Foul Water" when water-borne disposal is used. This product is a sanitary fixture constructed and designed to be installed that facilitates sanitation. This product is a sanitary fixture constructed and designed to be installed to allow effective cleaning.

- *options for compliance set out in section 19 of the Act (regulations, acceptable solution, verification method)*
- *standard or technical document that describes the performance of the building product or the relevant specifications to which the building product was manufactured.*
- *physical properties of the building product*
- *how the building product is intended to be used.*

Limitations on the use of the building product:

https://www.bunnings.co.nz/search/products?page=1&q=shaw+and+mason+toilet&sort=BoostOrder

WELS rated for water efficiency in accordance to AS/NZS6400.

Design requirements that would support the appropriate use of the building product:

https://www.bunnings.co.nz/search/products?page=1&q=shaw+and+mason+toilet&sort=BoostOrder
