VITAL 46mm TIMBER VENETIAN BLINDS

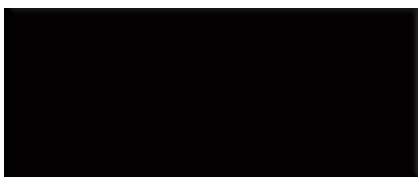

5
YEAR
WARRANTY

Wooden Blinds are supplied with Colonial Fascia.
Wooden Blinds do not come with Fascia End Returns as standard but can be ordered for \$15 per blind.

Enjoy the rich warmth that comes with installing Timber Venetian Blinds in your home. Add a touch of sophistication to any room, perfect for both modern and traditional homes. Vital Timber Venetian Blinds will help keep the heat out in the summer and keep the house warm in winter and are relatively maintenance free and easy to clean. Tilt cords are on the left, Lift cords to the right. Blinds are designed to be kept down and tilted for light and privacy control.

Black

White

Due to the nature of wood, there may be variations in slat colours.

VITAL 50mm PVC VENETIAN BLINDS

PVC Venetian Blinds are supplied with Colonial Fascia. PVC Venetian Blinds do not come with Fascia End Returns as standard but can be ordered for \$15 per blind.

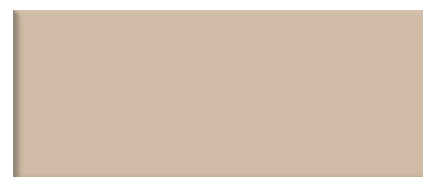

Vital 50mm PVC Venetians are a cost effective and fashionable alternative to Timber Venetians with the same practical features. These cord operated blinds are manufactured using a 50mm UV treated PVC slat which is resistant to fading, cracking and warping. PVC Venetians are suitable for any room in the home including wet areas such as bathrooms, laundries and kitchens. Blinds are designed to be kept down and tilted for light and privacy control.

INSTALLATION DETAILS AND 'NEED TO KNOWS' ABOUT YOUR VITAL BLINDS

HOW TO MEASURE YOUR BLINDS

Please provide precise measurements in **mm (Millimeters)** only. We recommend the use of a metal or rigid tape measure for added accuracy. Record the width first to the nearest millimeter. Next measure the height (drop).

ROLLER BLINDS

FOR INSIDE FIT

To fit blinds inside your window frames, the frame needs to be at least **70mm** deep.

Because some windows are not perfectly square, you must measure the width of the window in three places (top, middle and bottom) as well as the height (left, middle and right). **Please provide only the shortest measurements** (width and height).

Make sure that any window fittings (latches) will not get in the way of your blinds.

FOR OUTSIDE FIT

Blinds with an outside fit cover the window and frame.

Measure the width from the outside edges of the frame or architrave, measure width and height then add **70mm** to both measurements – only if you want the fabric to cover the entire architrave.

FOR OUTSIDE FIT WITH NO ARCHITRAVES

For width 'A', measure the opening of the window and add 100mm to provide an overlap each side.

For drop 'B', measure inside the window frame from one edge to the other in the centre. Add 100mm to this measurement to provide complete coverage of the window.

VERTICAL BLINDS

FOR INSIDE FIT

To fit blinds inside your window frames, the frame needs to be at least **75mm** deep.

Because some windows are not perfectly square, you must measure the width of the window in three places (top, middle and bottom) as well as the height (left, middle and right). **Please provide only the shortest measurements** (width and height).

Make sure that any window fittings (latches) will not get in the way of your blinds.

FOR OUTSIDE FIT

Blinds with an outside fit cover the window and frame.

Measure the width from the outside edges of the frame or architrave, measure width and height then add **75mm** to both measurements.

FOR OUTSIDE FIT WITH NO ARCHITRAVES

For width 'A', measure the opening of the window and add 100mm to provide an overlap each side.

For drop 'B', measure inside the window frame from one edge to the other in the centre. Add 100mm to this measurement to provide complete coverage of the window.

VENETIAN BLINDS

FOR INSIDE FIT

To fit blinds inside your window frames, the frame needs to be at least **36mm** deep for the 25mm Aluminium Blinds and at least **70mm** for the 46mm Timber Blinds and 50mm PVC Blinds.

Because some windows are not perfectly square, you must measure the width of the window in three places (top, middle and bottom) as well as the height (left, middle and right). **Please provide only the shortest measurements** (width and height).

Make sure that any window fittings (latches) will not get in the way of your blinds.

FOR OUTSIDE FIT

Blinds with an outside fit cover the window and frame.

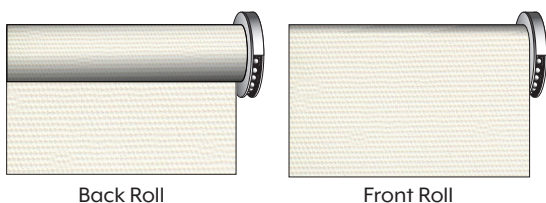

Measure the width from the outside edges of the frame or architrave, measure width and height then add **50mm** to both measurements.

FOR OUTSIDE FIT WITH NO ARCHITRAVES

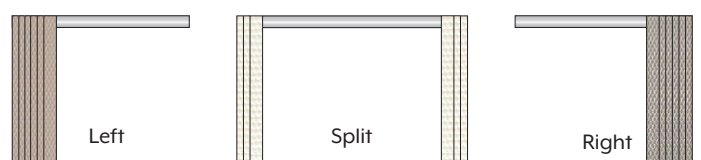

For width 'A', measure the opening of the window and add 100mm to provide an overlap each side.

For drop 'B', measure inside the window frame from one edge to the other in the centre. Add 100mm to this measurement to provide complete coverage of the window.

Roller Blinds can be installed as 'BACK' or 'FRONT' Roll options.

Vertical Blinds can be installed as 'LEFT', 'SPLIT' or 'RIGHT' stacking options.

NOTE: All colour guides in this brochure may vary from actual product colours due to the 4-colour print process.
