BUNNINGS
TRADE

Helping business is our trade.

With over 130 years' experience in the building industry, Bunnings Trade is your reliable source for quality window materials.

Bunnings Trade supplies a wide range of windows and glazed doors solutions for all types of residential and commercial projects. Our commercial offering includes a variety of styles, materials and custom designs, in project volumes to suit your needs. From apartment complexes and hospitals, to education campuses and private developments, our qualified team can partner with you to help deliver your next project.

Dowell

Responsible Sourcing

As a leading retailer of home improvement and outdoor living products, Bunnings is committed to ensuring all timber and wood products originate from legal and well-managed forest operations. To reduce the impacts to nature and biodiversity associated with the procurement of timber products, Bunnings' Responsible Timber Sourcing Policy seeks to exclude sources derived from deforestation and natural forest conversion. This is achieved by requiring that all natural forest timber products originate from independently certified forests

in line with the Forest Stewardship Council® (FSC®), Programme for the Endorsement of Forest Certification (PEFC) or another equivalent standard.

OUR RANGE OF WINDOW SOLUTIONS

The choice of windows brings both functional and aesthetic benefits to a building. With energy efficiency becoming a key consideration, advancements in technology have led to the development of windows with better insulation properties, which can contribute to a building's sustainability and energy efficiency rating.

The range of windows we supply caters to all needs and preferences, ranging from traditional styles to cutting-edge, innovative designs. We work with local, national, and international suppliers and manufacturers to bring you the widest choice of products at the best prices. All the windows we supply are tested to Australian Standards.

In addition to windows, we also supply a broad range of glazed doors and skylights to help you bring ample natural light and unobstructed views to any property.

[Home](#)

ALUMINIUM

Aluminium framed windows offer a multitude of benefits making them an excellent choice for both residential and commercial buildings. They are easy to install, reducing demands on time and labour.

Their high strength-to-weight ratio ensures structural integrity and security, and the flexibility of aluminium allows for a variety of window designs, from large picture windows to complex shapes, catering to modern architectural demands. When combined with the right glass, aluminium frames may offer excellent thermal performance and may contribute to better energy efficiency in buildings, which may help you achieve the required energy efficiency rating for your projects.

[Home](#)

ALUMINIUM

We can supply standard, over-size and architectural options of aluminium windows, with a choice of styles, frame colours, glass options, acoustic, BAL and wind rating options and U-values.

Window styles available include:

- ✓ Casement windows
- ✓ Double hung windows
- ✓ Sliding windows
- ✓ Sash windows
- ✓ Bi-fold windows
- ✓ Awning windows & gas strut awning windows
- ✓ Servery windows
- ✓ Fixed windows

For low-rise commercial builds we can supply a range of aluminium options to suit the needs of aged care, retirement living, childcare, accommodation, office, retail, schools and other similar projects.

[Home](#)

UPVC

uPVC framed windows may be a popular choice for homeowners and builders due to their many benefits. They are known for their excellent thermal insulation properties, which may reduce heating and cooling costs and help to achieve energy efficiency ratings. uPVC frames provide superior sound insulation, reducing noise pollution from the outside.

A key advantage of uPVC systems is their versatile functionality, including tilt-and-turn hardware, which allows for flexible ventilation and easier cleaning. When paired with multi-point locking functionality, these solutions may enhance both usability and security across windows and sliding doors. With a long lifespan due to resistance to weathering, rust, and corrosion, uPVC windows are a cost-effective option for modern construction.

For enhanced thermal and acoustic performance, uPVC frames may be combined with double or triple glazing.

Bunnings Trade works with local and overseas manufacturers to supply uPVC windows and doors to meet the needs of our customers for all types of construction projects.

- ✔ Easy to install
- ✔ Thermal insulation
- ✔ Sound insulation

TIMBER

Timber framed windows offer a blend of traditional aesthetics and modern performance. They are known for their natural insulation properties, providing a barrier against cold and heat that can help reduce energy costs and achieve energy efficiency ratings.

The versatility of wood allows for customization in design, ensuring that each window can be tailored to the specific style and architecture of a home, enhancing its overall appearance and value. The strength and durability of timber frames also contribute to their longevity, making them a cost-effective option in the long run.

Steel Window Design

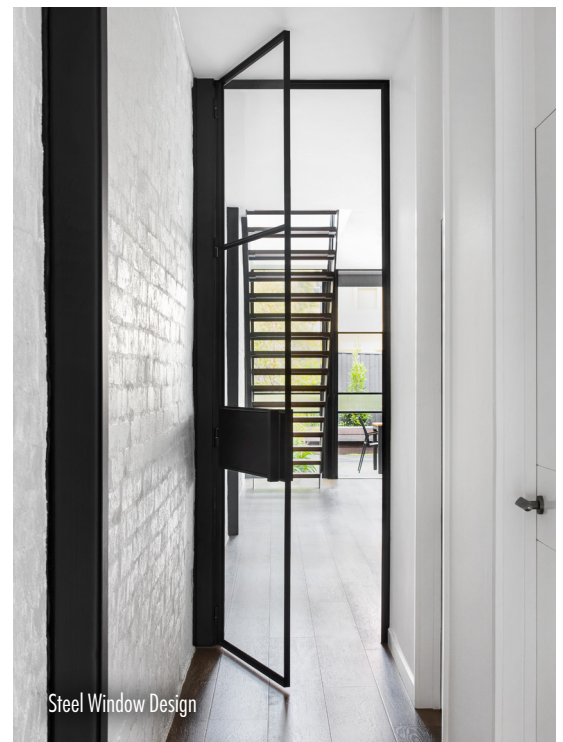

Steel Window Design

STEEL

Steel framed windows offer a multitude of benefits, both aesthetic and functional. Their slim profile allows for larger panes of glass, maximizing natural light and offering expansive views. The strength of steel means frames can be less bulky and more streamlined, contributing to a sleek, modern design. The material's versatility allows for various finishes, accommodating diverse architectural styles. Steel framed doors are also a stunning way to divide internal spaces and maintain visibility and light.

The robust nature of steel provides enhanced security as it is more difficult to compromise than other materials. Durability is another significant advantage as steel frames are resistant to warping, shrinking and swelling, ensuring longevity and ease of maintenance.

Bunnings Trade can supply steel framed windows and doors to be used in a variety of projects from historical renovations, new home construction and commercial buildings.

DOUBLE AND TRIPLE GLAZING

Double glazing offers significant benefits and can be a key component of the energy efficiency rating of a building. It is suitable for building in all climate zones, whether to keep heated air inside, hot air outside, or reduce the risk of condensation, which may assist in preventing mould growth and maintaining better air quality inside the home.

Double glazing enhances thermal efficiency, which may lead to reduced energy costs by minimising heat loss in winter and heat gain in summer. This contributes to a more stable indoor temperature leading to increased comfort. The additional acoustic benefits provide superior sound insulation, which is particularly beneficial in urban areas.

Thermally broken frames, featuring a barrier of low thermal conductivity material between the inner and outer frame, can increase the benefits of double and triple glazing and reduce the potential for condensation.

[Home](#)

DOUBLE AND TRIPLE GLAZING

Bunnings Trade supplies a wide range of double-glazed, triple-glazed and thermally broken windows in standard or bespoke sizing.

In addition to sourcing from local and national suppliers, we also partner with carefully selected international windows manufacturers that meet the stringent requirements of Australian Standards. This enables us to give our customers choice and flexibility when it comes to price and timeframes whilst not compromising on quality.

Rylock

LOUVRE WINDOWS

Highly popular in warmer climate zones, louvre windows offer a blend of aesthetic appeal and functionality. They provide excellent ventilation, allowing for the natural flow of air which can help to reduce reliance on air conditioning and lower energy costs. Louvre windows can be placed in key positions such as bathrooms, to circulate out hot air and moisture.

Louvre windows can contribute to a building's architectural design, offering a modern and stylish look that can enhance both residential and commercial properties.

Bunnings Trade supplies louvre windows from a range of manufacturers enabling us to provide pricing options to suit all budgets.

GLAZED DOORS AND FRAMES

Perfect for making the most of the Australian climate, glass doors allow natural light to create a bright and welcoming atmosphere while reducing the need for artificial lighting. They can provide an unobstructed view of the outdoors, connect interior spaces with the natural environment and can make rooms appear larger and more open, contributing to a sense of spaciousness.

Versatile in design, glass doors complement various architectural styles with their sleek and modern appearance. Safety tempered glass also ensures durability and resistance to impact, giving you peace of mind without having to compromise on style.

GLAZED DOORS AND FRAMES

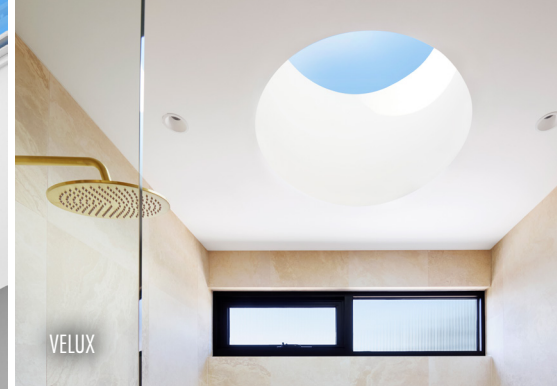

Through our extensive array of manufacturers and partners, we can supply glazed doors in a variety of styles, designs and materials.

- ✓ Timber, Aluminium, Steel or uPVC frames
- ✓ Single, double or triple glazed
- ✓ Slider and stacker door systems
- ✓ Bi-fold doors
- ✓ Commercial doors
- ✓ Frameless entry doors
- ✓ Automatic doors
- ✓ Pivot doors

Whether it's aesthetics, energy efficiency or versatility of space that you're after, Bunnings Trade can supply glass doors for your next project. All options are manufactured to meet Australian Standards at a range of different price points.

[Home](#)

SKYLIGHTS, ROOF WINDOWS AND SUN TUNNELS

The inclusion of skylights or roof windows may enhance the environmental efficiency of a building. They introduce natural light, reducing the need for artificial lighting and may improve energy efficiency ratings.

Vented skylights can introduce natural ventilation to a room, helping to reduce air humidity and condensation. These can be solar or mains powered for out-of-reach places, or manually opened.

Bunnings Trade can supply skylights and roof windows to meet all standards and requirements via suppliers that manufacture both nationally and internationally. Products are tested to meet Australian Standards, including heat & UV, bushfire, cyclone and water testing.

- ✔ Natural illumination
- ✔ Thermal insulation
- ✔ Energy efficient glazing
- ✔ Natural ventilation
- ✔ Toughened glass

SUPPLY AND INSTALLATION SERVICES

Working with our commercial Supply and Install team, you will have a single point of contact for the project, and we work with you to align deliveries to your schedule. We supply windows when and where required, helping you meet deadlines and progress milestones.

Our comprehensive service for window supply and installation has solutions for all types of residential and commercial projects. In addition to support with value management and delivering from specifications, our Supply and Install team offer project management services and arrange and manage installation.

You benefit from both our knowledge and backing

We choose our installation partners by way of a rigorous selection process with all being fully vetted and verified as installers.

We have experience delivering thousands of jobs across a number of categories, including windows. Our projects cover a wide range of requirements, including multi-stage and multi-million dollar projects.

- ✓ Single Point of Contact
- ✓ Project Managed
- ✓ Expert Installation
- ✓ Value Engineering

Other Services:

Our Building Solutions Studios showcase innovative whole of build solutions all in the one location. With studios located in Melbourne, Sydney and Brisbane, our dedicated team of specialists are here to assist you with our curated selection of windows, for both residential and commercial jobs.

Our Category Specialists are a dedicated team of experts here to assist with window solutions for your next project. No matter how big or small the job is, they'll help you establish the best options to suit the specifications of your build.

ORDERING VIA BUNNINGS TRADE

Talk to us about your window and door requirements and we will work directly with our suppliers to deliver the best value option for your projects, saving you time and money. Place an order and we'll have your windows and doors delivered directly to your site.

1. Provide your plans to your Bunnings Account Manager or Trade Specialist. They will liaise with our internal Window experts to determine the most appropriate window supplier for your job.
2. The window supplier will complete a take-off to evaluate the exact type and quantity of materials required for your build.
3. Bunnings Trade will provide a copy of the take-off, a quote and a contract for the products required for your review and approval.
4. Upon placement of order, manufacturing will be scheduled and the estimated delivery timeline will be confirmed with your nominated site contact.
5. Your order will be delivered to your site and invoiced to your Bunnings account.
6. Any after-sales service and additional requirements will be serviced directly through you by the relevant window supplier.
