The Bunnings Heat Pump Supply and Installation service is available for standard single-level, back-to-back installations. A standard back-to-back installation includes a split-system heat pump with a wall-mounted indoor unit and an outdoor unit positioned directly below and opposite on a single-storey dwelling.

Included in a standard installation:

- Single-level, back-to-back installation of the selected heat pump
- Installer site visit to the customer's property
- Installation completed by a licensed professional installer
- Up to 3 metres of pipework and ducting, concealed by PVC
- Up to 10 metres of electrical cabling
- Outdoor unit positioned on an existing hard, level surface such as concrete, timber or pavers
- Installation on weatherboard or timber-clad properties only
- Electrical compliance certificate
