

# ezistep

DIY saves time & money!

**IMPORTANT**

Treads are GROOVED to comply with Australian Building Code 3.9.1.1g

**MADE IN AUSTRALIA**

## These ezistep kits are ready to install & assemble

This affordable self assembly step kit is aimed at the builder or DIY handyman. For a professional finish that saves time and money.

The ezistep can be assembled with a power drill and some screws. The treads have slip-resistant grooving near the edge of the nosings (COMPLIES WITH AUSTRALIAN BUILDING CODE 3.9.1.1g) and the stairs are routed in for secure and longer lasting construction.

The stairs are made from treated pine and are manufactured wholly in Australia from plantation timbers. H3 treated pine, suitable for above ground outside use. Also available in Merbau.

This product is designed to Australian Building code standards, but be sure to check with your local planning laws to ensure the right attachment to your structure is used.

All you need is a power drill with a #10 (No.2) square attachment to assemble

## STRINGER KITS
