This product must be installed in accordance with all local, State and National Standards and Regulations, by qualified and licensed trades. To ensure your safety and best user experience, always refer to User Manual.

FAQs

What needs to be considered before installing a bidet toilet suite? Water supply and electrical supply layout within the bathroom is very important and should be discussed with your licensed plumber and electrician prior to purchase and installation.

What is an S Trap and what is a P Trap? This refers to where the waste exits the bathroom. An S trap pan has a waste pipe that is connected to the floor. A P trap pan has a waste pipe connecting directly to the wall.

Is there an S Trap Pan Connector included? Yes, a Vario Bend S Trap is included.

Is there a P Trap Pan Connector included? No.

Does this item meet the required Australian Standards? Yes.

What does S Trap adjustable setting distance refer to? This is the measurement your installing plumber needs to know for S Trap installations. The measurement is taken from the wall to the centre of the waste outlet in the floor. The S Trap adjustable setting for the Concerto Ultra Bidet Suite is 90-180mm. A P trap's installation height is fixed at 180mm.

Are the valves pre-installed? Yes, however we recommend checking for leaks once installed.

Can a bottom entry inlet valve be installed on the left or right side? Whilst the pan accommodates left or right bottom entry, the water supply hose for the bidet seat is on the left side of the toilet seat and therefore the water connection must be to the left of the toilet.

Can a rear/top entry valve be installed? No.

Does the Touchless Flush Kit also have a button? Yes, there is an intervention button which may be set to either half flush or full flush by a licensed plumber.

Can the cistern only be installed with the Touchless Flush Kit? A Dual Flush Button is also included with the Concerto Ultra Bidet Toilet Suite providing you with an option to install either the Touchless Flush Kit or a Dual Flush Button.

Can toilet cleaners be used in the cistern? No, this will cause damage to valves and washers.

How is the toilet pan fixed to the floor? A floor fixing kit is provided and then a bead of sealant (wet area silicone) will need to be applied around the base of the pan.

Can offset pan collars be used with the installation of this product? No, offset pan collars affect the flushing performance and are not recommended or warranted.

Are any batteries included with the Concerto Ultra Bidet Suite? No. The Sensor Flush button will require 4 x AA batteries and the Ultra Bidet Smart Seat remote control will require 2 AAA batteries.

Is the bidet seat easy to maintain? Yes. The bidet seat has a self-cleaning nozzle as well as nozzle cleaning on request by remote control. The User Manual contains comprehensive instructions for the cleaning and maintenance of the Ultra Smart Bidet Seat.

*The pan and cistern are warranted for 10 years and the bidet smart seat is warranted for 3 years.
