Assembly

- 1 Find a convenient, well-ventilated position for your **Tumbleweed Cube®**. Some ideas could be in your kitchen, laundry, basement or on your balcony.
- 2 Snap all four **Legs** into the **Collector Tray**.

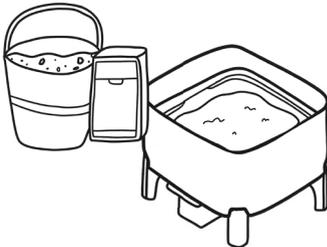

- 3 Slide the **Liquid Collection Container** into place below the drainage hole of the **Collector Tray**. Place one **Working Tray** inside the **Collector Tray**.

- 4 Place the **Worm Farm Bedding Block** in a **Bucket** with **5L of Water** to expand. This will take approximately 10 minutes.

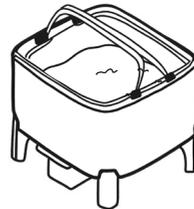

- 5 Spread **3/4** of the **Worm Farm Bedding Block** inside the **Working Tray**.

- 6 Stack the second **Working Tray** onto the first **Working Tray**.

Add the remaining **1/4** of the expanded **Worm Farm Bedding Block** to this tray.

- 7 Tear up the **1/3** carton that your **Tumbleweed Cube®** came in and mix into the bedding in the **Working Tray**. Store the remainder of the carton to use in your worm farm as required.

- 8 Add your worms and secure the lid.
