Specialist Disability Accommodation (SDA)
## Robust Design Product Solutions

Your partner for
Specialist Disability Accommodation
(SDA) solutions

The Bunnings Commercial team is here to service you from the front gate to the back fence. We are committed to bringing you the most trusted brands that specialise in products tailored specifically for individuals living with a disability and supportive of Specialist Disability Accommodation (SDA). Across all building stages we've got you covered for your SDA Robust projects.

With over 130 years of supplying building and hardware solutions, Bunnings can supply everything from timber frames and trusses, to flooring, joinery, kitchens, appliances, commercial grade windows, façades, plumbing, lighting and more to cover all elements of an SDA Robust design. We're much more than a supplier, we're your partner. In addition to all the specialist products required for an SDA build we can supply:
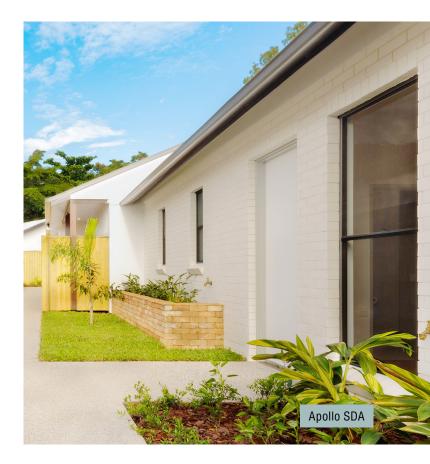

- ✓ **Foundations and Footings**
- ✓ **Windows**
- ✓ **External Cladding**
- ✓ **Roofing**
- ✓ **Insulation**

- ✓ **Heating, Cooling and Ventilation**
- ✓ **Hot Water solutions**
- ✓ **Outdoor Timber**
- ✓ **Fencing**
- ✓ **Fasteners and Fixings**

Leading Brands

3monkeez

3monkeez supply commercial stainless steel plumbing products that have become the trusted choice for plumbers and builders nationwide. Known for their durability and premium quality, their products are designed with the needs of high-use environments in mind. Equipped with all necessary certifications and backed by ISO9001 certification, you can install 3monkeez products with confidence, knowing they'll meet the rigorous demands of assisted living projects.

GalvinEngineering
the mark of reliability

Galvin Engineering is a 4th generation, family owned and operated, Australian manufacturing company and master distributor. They have assisted in the design and delivery of hundreds of Mental Health and Robust Housing projects of all types over the last 90 years and have extensive experience in providing specialised tapware and bathroom solutions.

Bradley
AUSTRALIA.COM

For the past 60 years, Bradley Australia have manufactured and supplied a comprehensive range of high-quality, competitively priced accessible washroom accessories across a variety of industries. Their products all comply with the relevant codes including AS1428. Durability, design and attention to detail, combined with easy installation, make choosing Bradley not just the right choice for your project but for your business and bottom line.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE AT BUNNINGS

Responsible sourcing

At Bunnings, we're committed to ensuring the products we sell, come from legal and sustainable operations, with good working conditions and fair treatment of people. As such, we continue to pursue sustainability by striving to make them socially responsible, environmentally aware and economically viable.

Sustainability

We are also committed to helping customers live more sustainably, and we are proud of the role we play in supporting local communities to make a positive difference. We recognise that our business plays an important role in reducing carbon emissions and addressing climate change. We have a comprehensive roadmap in place to reduce our energy consumption and to transition towards using more renewable energy sources.

In our Community

Bunnings is committed to participating in the communities in which we operate by contributing to local, regional and national causes, charities and organisations throughout Australia and New Zealand. We provide ongoing assistance to a wide range of local community groups including schools, sporting clubs and service clubs.

Robust Design Standard

Specialist Disability Accommodation (SDA) with the design category of **Robust** is specifically designed to cater for people who require an environment resilient to high impact behaviours, and provides a safe space for both the residents, and the community.

These accommodations are constructed using resilient, but inconspicuous materials to reduce the risk of injury, minimise neighbourhood disturbances, and cope with heavy use. They will also include features such as secure windows, doors, walls and soundproofing. The design also takes into consideration the need for reduced stimuli, which is beneficial for people who may have behavioural concerns.

Robust SDA homes are not only durable, but they also incorporate elements that are easy to clean and maintain, ensuring longevity and a consistent living environment. The goal of Robust SDA is to provide a living space that supports independence while ensuring the safety and well-being of its occupants.

It's a thoughtful convergence of durability, functionality, and design, intended to create a harmonious environment that respects the needs of individuals, ultimately contributing to their quality of life and community integration.

When building to the SDA Robust standards, additional consideration will need to be given to the selection of many materials and products, including:

- Flooring and wall coverings
- Lighting and soundproofing
- Door and window furniture and locks
- Front-of-wall plumbing, tapware and bathroom accessories
- Anti-Ligature and vandal-proof fixtures and fittings
- Safety glass and window coverings
- Joinery and benchtops
- Appliances

KITCHEN AND LAUNDRY

INTRODUCTION

TAPWARE

SINKS

APPLIANCES

INTRODUCTION

The SDA Design Standard specifies the following requirements for Kitchens and Laundries in Robust builds[*]:

- Kitchen with a fixed cooktop with a rangehood, an in-built oven, a sink with tap and standard or drawer-style dishwasher

- D-pull cupboard handles located towards the top of below-bench cupboards and towards the bottom of overhead cupboards

- Kitchen benchtop and cabinetry to be made of robust materials

- Laundry with a sink or tub with taps

[*]The NDIS SDA Design Standard (SDA) must be consulted with respect to design and compliance requirements. The products presented in this catalogue also rely on correct installation to meet the requirements of AS1428.

AUTOMATED ACCESS

DOORS AND
DOOR HARWARE

INTRODUCTION

The SDA Design Standard specifies the following door and door hardware requirements for Robust builds[*]:

- Doorways need to provide a minimum opening clearance of 820mm

- All internal doorways should have a level, step-free transition and threshold (maximum vertical tolerance of 3mm vertical or 5mm between abutting surfaces is allowable provided the lip is rounded or bevelled)

- Any Timber doors provided should be solid core.

- All glazed areas, glazed doors, and side lights should be laminated glass or polycarbonate resin thermoplastic material

- Doorways should have door handles installed at between 900mm to 1100mm above the finished floor level

- Products selected need to be durable and resilient with additional consideration required for resident's fixtures and fittings to be vandal-proof at minimum (low risk) or anti-ligature (med/high risk)

[*]The NDIS SDA Design Standard (SDA) must be consulted with respect to design and compliance requirements. The products presented in this catalogue also rely on correct installation to meet the requirements of AS1428.

ELECTRICAL

INTRODUCTION

SWITCHES

LIGHTING

INLINE EXHAUST FANS

INTRODUCTION

The SDA Design Standard specifies the following Electrical requirements for Robust builds[*]:

- Light and power outlet switches should be rocker action, toggle or push pad in design with a minimum width of 35mm

- Dimmable lighting switches should be provided in living areas and bedrooms

- Task lighting should be provided above workspaces. A minimum level of 300lux should be achieved when tested at maximum intervals of 1500mm, directly over the surface of the benchtops

- Recessed lighting fixtures should be provided

[*]The NDIS SDA Design Standard (SDA) must be consulted with respect to design and compliance requirements. The products presented in this catalogue also rely on correct installation to meet the requirements of AS1428.
