

We only use the highest quality materials for our kitchen projects. Our products are durable, functional, and stylish, ensuring that your kitchen will last for years to come. Our natural stone is sourced from quarries from all around the world.

How It Works

It's simple as 1,2,3! Follow the steps shown to order your stone benchtop. If you need further assistance, speak to a team member at the Special Orders Desk In-Store.

1. Select The Product You Want

View the exclusive range available in this brochure or online.

2. Arrange A Measure & Quote At The Special Orders Desk

After you have selected the product you want, fill out the order form that can be found in this brochure to complete an estimate. Take your form to the Special Orders Desk to arrange a measure & quote.

3. Book Installation

Once your measure and quote is complete, return to the Special Orders desk to pay for your new natural stone benchtop. The supplier will then call you to arrange your installation.

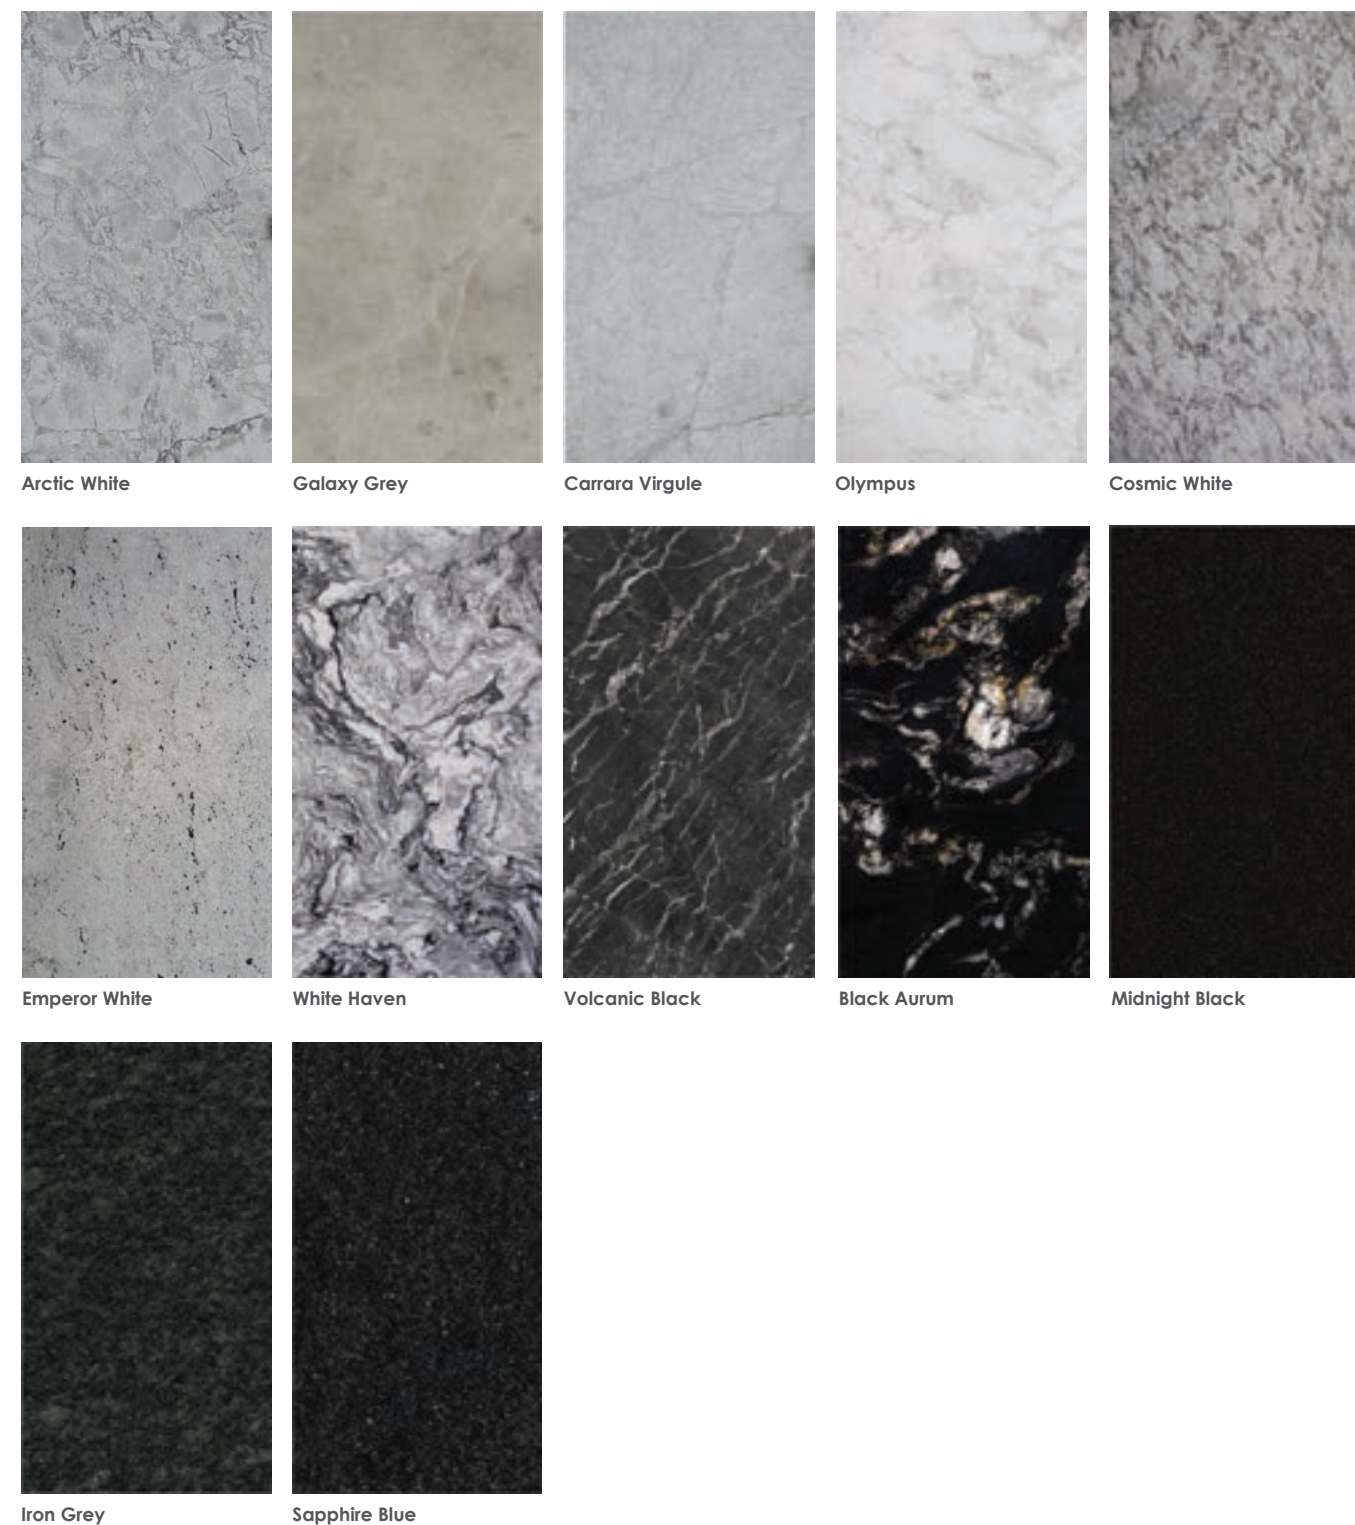

Natural Stone Benchtops

CARE & MAINTENANCE

DAILY CARE FOR YOUR BENCH
Please follow the below daily care guidelines for care & maintenance of your stone benchtops

COASTERS
Where possible – use coasters under all glasses specially the ones containing citrus or alcohol.

AVOID HEAT / DIRECT CONTACT WITH HOT PRODUCTS
While Stone can withstand heat it is recommended to use trivets / Heat Proof Mats under under pots and pans. A hot pot / pan placed directly on the benchtop surface can cause the bench to crack due to thermal shock.

SPILLS
Blot the spill with paper towel / lint free cloth immediately – do not wipe as it may spread the spill. Flush the area with warm soapy water & rinse several times and dry thoroughly with a soft cloth.

AIR FRYERS
Air Fryers are not recommended directly over the benchtop due to heat from the product. Use a trivet under the appliance.

WEIGHT ON BENCHTOP
Under no circumstances, anyone shall climb up or sit on the natural stone benchtop. This may result in a crack / breakage of the benchtop. This also applies to anything heavy sitting permanently on bench (example Aquarium).

CLEANING
Do not use sandpaper or any cleaners that contain grit / abrasives to clean natural stone surface. We recommend cleaning surface with clean, soft cloth and fresh warm water.

CUTTING BOARDS
Use an anti slip mat under the chopping board & do not use cutting knives direct onto the benchtop.

KEEP THESE AWAY FROM NATURAL STONE SURFACES

While it is possible to remove stains on clean natural stone products using certain tools and cleaning products, there is no guarantee that these methods will work effectively. We recommend extra care if any of the below comes in contact with your natural stone benchtops

Oil based stains such as Grease, Tar, Oil & Cosmetics
Organic stains such as Coffee, Tea, Citrus, Tobacco, Urine, Bird Droppings Etc.
Inorganic metal stains such as Wrought Iron, Rust, Copper, Bronze Utensils.
Paint & Ink Stains

Many of the above mentioned stains can be avoided by sealing the potentially porous stone benches. Use of a sealer will either provide enough time to remove the spill before any permanent staining can occur or minimise the extent of damage.

THINGS TO CONSIDER

- Natural Stone will have variations in colour, tones, texture, pattern, vein, structure, finish and dimensions. Natural Stone may also have pitting, fine fissures and veins. There may be variations within the stone. All Bunnings Store samples, brochure & website images are only an indication of vein & colour. These variations are part of what makes Natural Stone so beautiful & unique.
- Some or all the below points may be applicable to your natural stone purchase.
- Due to the fact that this is a natural product small indentations (varying in size), may be evident throughout the stone surface.
- Variations within the stone samples or images viewed are only an indication of colour and vein and will vary from slab to slab.
- Differing degrees of polish from one slab to another, or within the same slab.
- Fissures and/or graze marks may be evident throughout the material. Initially these may not be visible, however they may become apparent during manufacturing and/or after installation due to construction movement and moisture absorption.
- Resin fill (cement based where required) may be used throughout stone preparation. Variation in stone thickness.
- All openings (Under-mounted Sinks, etc.) will show the thickness of the Stone and not the Edge Profile. It will be finished with straight and aris edge around the rim.
- Stonework will only be caulked to a finished painted surface or finish panels/joinery. At no time Petra Global is responsible to scribe stone around out of square or irregular walls or caulking to these areas.
- Overhangs may vary and will vary to allow installer to obtain parallel joints with adjoining pieces.
- Joints are inevitable. An indication of the location can be given, however, joint location is at Petra Global's discretion at any stage. Joints are within the following tolerances (2.5mm +/- 1mm).
- Vein matching (where possible) can be done at additional cost, all care will be taken to match veining from one slab to another, however, a perfect match may not be possible.
- All stone is susceptible to staining. It is noted that etching, dullness, or water marks may still occur in the stone even though it is sealed (penetrating/impregnated regular sealer).
- Petra Global reserves the right to patch, fill, reinforce and repair breaks, opened veins and/or chips.
- Maximum overhang allowed without structural support is 300mm. Overhangs exceeding 300mm will require structural support which is to be provided by the customer. Structural support must be discussed on check measure.

3 MEASURING YOUR BENCHTOP

Use our estimate guide to design your perfect kitchen.

- 1 Draw a sketch of your benchtop area. Please mark visible edges, walls, sink and cooktop as per example below. Be sure to mark measurements in metres.
- 2 To calculate the square metre area (m²) of your benchtop multiply length and width of each section, then add the m² area of each section to give you the total m² area of your new benchtop.
- 3 Use the pricing table to calculate the price of your new benchtop based on your measurements. (Please note that measurements will be confirmed during your site assessment by your stone benchtop installer.

CALCULATE SQUARE METRE AREA (m²)

Benchtop Section A	2.4m x 0.9m = 2.16m ²
Benchtop Section B	1.4m x 0.6m = 0.84m ²
Underbench Return C (If applicable)	2.4m x 0.3m = 0.72m ²
Benchtop Section D (waterfall)	0.9m x 0.6m = 0.54m ²
Waterfall Return Section E (Waterfall Return)	0.9m x 0.15m = 0.13m ²
Total m² (A + B + C + D + E)	=

a) Multiply square metre price by total m² area
b) Add all items in pricing table to provide a price estimate for your new benchtop based on your measurements.

EXAMPLE ONLY

FIRST PAYMENT/ SITE ASSESSMENT

Payment is required for the installer to conduct an on-site assessment/check measure of your benchtop. Please note any discrepancies in measurements may affect the total price.
