

- ✓ IDEAL FOR EMERGENCY PLUMBING REPAIRS
- ✓ PROVIDES A WATERTIGHT AND AIRTIGHT SEAL
- ✓ STRETCHES OVER 300%
- ✓ LEAVES NO RESIDUE AND IS EASILY REMOVABLE
- ✓ TEMPERATURE RANGE: -55°C TO 260°C

EASY INSTALLATION

1. Dry the object before applying tape.
2. Peel liner away from silicone tape.
3. Press tape firmly on object being wrapped, hold in place and begin first by wrapping completely over itself.
4. While holding tape in place, begin stretching at 2 to 3 times its length and wrap object with a 2/3rd overlap to ensure proper seal.
5. To complete wrapping of object, wrap tape completely over previous layer and press firmly. Cut with scissors or knife.
