WHEELMUCK+

A radical brake dust wheel cleaner, that has been specifically designed to remove brake dust effortlessly. This cleaner is fast acting and has been specially formulated at a viscosity to allow easy application.

Wheelmuck+ undergoes a colour change from yellow to red as a reaction occurs to dislodge the brake dust iron contaminants, enabling it to be washed away with water.

FEATURES:

- Ⓜ Completely different technology to regular wheel cleaners.
- Ⓜ PH neutral - safe on wheels and painted surfaces.
- Ⓜ Low odour active - 100% biodegradable.
- Ⓜ Low foaming.
- Ⓜ 2-3x more wheel washes than similar imported products due to Wheelmuck+ allowing a very thin application and still working extremely well.
- Ⓜ Better coverage due to viscosity and anti foaming properties.
- Ⓜ Colour coding during stages of reaction with contaminants.
- Ⓜ Use for decontamination of vehicle body panels & rust removal.

CAUTIONS:

- Ⓜ Older style wheel balancing weights with metal clips may get tarnished.
- Ⓜ Oxidation can occur on zinc, cadmium or raw surfaces.
- Ⓜ Hose off driveway oxidation stains after application. Stains will naturally disappear in a couple weeks.
- Ⓜ For ceramic pad dust, dirt, grease or tyre silicone overspray, a slight agitation with soft brush is necessary.

MOTOMUCK SQUIRTER

Perfect for the 5L bottle of **Wheelmuck+** and **Automuck Clean**. This makes application quicker and easier in those hard to get spaces.
